

X2"
Dec. 18, 1982

Dear 

I hope that your recent surgery went well, that you are recovering your strength, and that this letter reaches you at an opportune time.

Sir, I sent you letter "A" enclosed on 10/24/82, which has as yet to be responded to.

→ Letter "B" enclosed, arrow, at #2, indicates that you did receive a "technology update briefing" while at FTD this year.

You are an individual of great integrity and no one "pulls the wool" over your eyes. Taking note of your letters "C and D", I can not imagine, that while at FTD, you would not have taken the opportunity to either validate or refute the "Blue Room" rumor.

Sir, having a current secret clearance, I have no intention in compromising national security. To this end, I have checked with both my former and current security offices about the "Crashed Saucer Rumor". They know nothing about a prohibition in seeking information to validate this "rumor". I thus ask again MOST SPECIFICALLY!

Does our Air Force possess (or has it ever had) the remains of a "Crashed Flying Saucer" at FTD and are the remains of alien cadavers among this debris?

Can you tell me the particular field or general area of "technology" you were briefed upon at FTD (this year) without revealing classified information?

Letter "E" enclosed (from you) to Mr. Arnon (about the alleged FTD material-UFO debris) indicates that you "... heard that there is a plan under way to release some, if not all of THIS (my emphasis) material in the near future."

When can we (the public) expect to see such a release?

These are very simple and straightforward questions, Sir.

I respectfully request a response as your health permits.

The warmest of this season's greetings to you and yours!

Most Sincerely
