

Oct. 3, 1981

Dear [REDACTED]

Sir, I have been reading your book- WITH NO APOLOGIES and came across the section dealing with the U-2 and SR-71 photo-reconnaissance aircraft. See "A" enclosed, arrow.

Sir, forgive me for a layman's psychoanalysis of you through your words here, but it does appear that you are proud (and rightfully so) of your accomplishments in having been involved with the U-2 and SR-71 aircraft.

Sir, I too have been involved with the U-2 aircraft. See "B" enclosed, page 2, at second arrow, and letter "C" enclosed. Letter "C" is in response to a question I had regarding the current security responsibilities respective of those who worked on the U-2 project.

Sir, since the late 1960's, the U-2 has (at local airshows) been accessible to the public at large, and with no apparent security restrictions. See "D" enclosed. I was thus able to photograph an equipment bay harness I had installed 17 years previously. See "D", page 2, arrow.

Sir, I have also worked for the Hycon Mfg. Co. of Monrovia, Calif. See "B" enclosed, page 1, arrow, and "E" enclosed, caption, underlined.

Sir, like you, I was also privileged to talk with Francis Gary Powers about his U-2 flights (See "F" enclosed) and arrived at your same conclusion.

Sir, I share this information with you in an attempt to convince you of my credibility. I also hope that it will demonstrate the fact that most, if not all "such" once highly classified projects are now common knowledge, publicly accessible. Even the super secret SR-71 (and predecessor-see "G" enclosed) are now demonstrated at local airshows. See "H" enclosed.

Sir, noting this fact, I do not now understand why that which you testify to (See "I, J, and K" enclosed) still remains classified after all these (30+) years. Austensibly (as the story goes) you tried to gain access to the "blue room". See "L" enclosed, page 124, arrow, and "M" enclosed, page 5, arrow.

Sir, it was at the Hycon Mfg. Co., some years ago, where I met a fellow technician who said that he had seen the "blue room" artifacts. This technician is still unknown (as a source of information) to those currently publicizing "Crashed Saucer" stories, like "L and M" enclosed. Doubting this tech's testimony, it was not until years later and subsequent stories (naming you) that I came to write to you. You confirmed this tech's testimony with your "We both know about the rumors." statement of letter "I" enclosed. This thus initiated the desire for me to pursue the truth about the "blue room" secret.

Sir, a letter directly to the Wright-Patterson facility will only illicit a denial. See "N" enclosed. Since you acquired the position on the Select Intelligence Committee as watchdog over the CIA, it is now presumed that (noting your ability and interest) you would now know the "blue room" secret.

Sir, noting the fact that one individual has come forward now to tell his story about the "blue room" secret (See "C" enclosed) I would thus like to ask the following questions. I have tried to construct them in a manner so that they can be answered most simply.

- SEE "P"
1. Is the narrative about you per "L", page 124, essentially correct?
 2. To your knowledge, is or was "this" area actually identified as the "blue room"?
 3. What specific individual now holds the right to declare the "blue room" artifacts as classified or unclassified?
 4. Are you now aware of the contents of the "blue room"?
 5. Have these artifacts been relocated to another area?
 6. Why were these artifacts not declassified and publicized as noted in "M", page 3, arrow, "I", at note (your comment) and "P" enclosed, arrow?
 7. Can we hope in the near future for these artifacts to be released and the "blue room" secret to be thus clarified?

I trust that my continual petitioning of you for an answer to this subject matter is not too burdensome. I have always admired and respected you Sir, for your integrity, I pray that I may continue to do so.

I have enclosed a self-addressed, stamped envelope in the hope of receiving a response to my specific questions.

Thankyou for your time, Sir.

Most Sincerely
