December 16th 1999 by Paola Harris

Dr Steven Greer part 1

How did you feel when Colonel Corso died? What do people think?

He lived longer than a male in the United States usually does but the timing was a little strange. There are younger people who are dying mysteriously who are trying to get the truth out and that is even more bizarre.

Paola: Are you talking about Congressman Shift from Arizona

Greer: I'm talking about about five people on my team. You know I have metastatic malignant melanoma (cancer) My long term assistant, who worked on this for about six years died in January and we had a former CIA director who was going to give definitive proof and assets, he was killed. In this business, there have been a number of mysterious deaths in the last two years but all we can do is move forward.

Paola: We did have Colonel Corso speak here in Italy on major television and we miss him terribly and we need that caliber of witness to come forward with the facts.

Greer: Have you identified similar, perhaps lower ranking, but perhaps similar witnesses in Italy who are military and who will come forward.

Paola. No. We don't have them in Italy.

Greer: yes they do. There are official UFO projects and events which Are taking place in Italy and one of the things I would suggest is in the context of this interview put out a call for these kinds of people to step forward. One of the things that I want to stress here , as supportive of the kinds of things that Colonel Corso was doing, It was being done in a uncoordinated fashion and its intrinsic efficacy of disclosure and there is a direct relationship to how many people do it and in what kind of setting and how effective it is. You know we have had in the past preliminary like colonel corso and Pavel Papovich in the Soviet Union and astronaut Gordon Cooper in the United States come forth with their own sightings and experiences.

Dr Steven Greer

Part 2

The purpose of ~~moving the~~ depicting the Extraterrestrial as hostile in space:

Military machine

It catapults this trillion based operation into a space-based operation which becomes multiples of that which instead of drawing most of its revenue from Europe and America can derive most of its revenue from the entire globe to militarize space and to engage the extraterrestrial in hostile engagements and violence and in order to do that you have to demonize the enemy. No war can be fought, no sacrifice of the order I'm talking about will happen unless you have psychologically prepare people to hate and psychologically prepared people toward hate fear and loathing and by orchestrating these hoax abductions, and hoaxed mutilations, you lay the psychological foundation through the pop culture and through the UFO community. This is what is so ironic, the UFO community itself is the main purveyor of misinformation. It subserves an interrelated agenda mainly financing a huge military operation. Now this is a very dangerous game we are playing without percent (non e stato mai fatto nella storia)

Paola: What about the abduction phenomenon researchers that see this a negative alien agenda.

Greer: Let me say only that anyone who takes that phenomenon at face value ~~has not done their homework~~.

Number2. And in some cases they have willfully ignored data which strongly supports that the abduction phenomena as it is described as an abduction syndrome is largely if not in toto human.

Paola: If you are saying this then what are you truly saying...that the abduction phenomenon is a "human" phenomenon? Then what is the nature of the alien presence then?

Greer: Ah. That's a good question. That's beginning hidden with the ton of false material being dumped on it That is a very complex issue The actual extraterrestrial phenomenon is rarely seen and is very present, has been for a long time, patiently waiting for us to grow up so we can become a

landed or been tracked on radar doing extraordinary things. What I'm trying to point out to people is that by presenting different people from different walks of life, who in an official capacity who have had top secret clearances and who have handled various aspects of this phenomenon over 40 or 50 years, it makes a very compelling case much more so than one person's story no matter who that person may be. This could be done in through a governmental agency or a very well done documentary series. We don't have the funding at this point. The Cseti team of consultants who have worked without pay have been working on this for about five years now.

Paola: and Edgar Mitchell too. Weren't you involved with that.

Greer: But he is not a direct witness. I am now speaking of first hand military, scientific and aerospace witnesses who have worked on projects dealing with the ET issue and have been present at very unambiguous ET events. So what we are doing is something that has never been done in the 50 years of the coverup. Most people, will find a Philip Corso or a Gordon Cooper and say Ahha, this is going to end the secrecy. Well it doesn't and it never will and the reason is that you have to combine a multidisciplinary approach to this that involves not only dozens and dozens of top secret witnesses ~~from all over the world~~

in one disclosure setting but you also have to combine that then with other scientific evidence, hard evidence, government documents and things of this sort that you make a very compelling case. Because Corso's information was not coordinated with other people of similar stature in a way that was very much probono and non commercial., what happened was that it got discounted heavily by the scientific, political and mainstream media community. It is most important to get the truth out to the whole world and to do that requires a much more sophisticated strategic plan that people have undertaken. What we(Cseti) have concluded from studying this for a number of years (from Donald Kehoe in the 60's trying to do the same thing) is that the weight of the evidence in a multidisciplinary setting with literally dozens if not a couple of hundred top secret witnesses coming forward in a blizgreek which simply overwhelm anyone's ability to dismiss it. And I think this is very important, if it one person 's story like Colonel Corso's that has no further corroboration or and that story comes out and what happens is that story falls off the radar screen of the major political, media , military and scientific establishment community. So what we have concluded in at Cseti in project Starlight that we have been working on for five years now. The central strategy is to find the PHILIP CORSO in Italy, in the United states, of Germany , of England and the former Soviet Union and combine their knowledge and their witness testimony in a very well done mainstream disclosure process perhaps in the United Nations or a little country that Michael Hesseman told me about named San Marino. Now the concept is to move all this testimony.. we have nearly 200 of these witnesses identified. Some are people who have had deep involvement and some of these people have just incidentally been present when these things have

peaceful species so they can interact with us openly. Baring that, they have been trying to introduce themselves to us gradually, waiting for that time where we will step into some semblance of maturity as a species being able to engage

them in a peaceful fashion We had an opportunity to do this in the 40's and 50's and we failed. That's when the movie ~~THE DAY THE EARTH STOOD STILL~~ came out. That whole movie was made with the prompting of peace - oriented people in the state department trying to send a message to militarists who were trying to militarize the relationship between human and non human life forms. It is a complex story.

Paola: Is there any truth to the fact that there is a federation that has not only visited the Earth but has interfaced with Government leaders asking them let them be present and so forth.

Greer: You need to take this very carefully. What I think has happened is that have been Enclaves (meetings) like you describe but we have subsequently betrayed them. And that ultimately so called Federation of Extraterrestrials species have not only been betrayed but are currently being targeted and struck by the weapons that we are using to track them and to target them.. Basically that which we think are extraterrestrials working with our military working with our military using crafts that look like ET craft.

Paola: this I just get from Ed Fouche whom I just interviewed. Have you heard of him?

Greer: I know him too. I'm helping people connect these dots. Look what I want to say here is that cloning...for instance..The cloning of Dolly the sheep was not the first cloned entity. What you have to understand is that whatever exists in the public domain or even in the cutting edge of science is five of ten generations backward ...behind of whatever exists. That includes the biological sciences. People say but it's a grey but maybe it's not extraterrestrial...maybe alien but it is not Et. It could be a biological ..sort of life form that looks like a Et. I'm quite convinced that resources exist in the scientific prowess , in the

6

scientific capacity exists in order to simulate and hoax extra terrestrial events so that you can control the public perception of the phenomenon.

Because that you need to do in order to set up the holy war in space that your right wing groups and your religious nuts and your militarists want. These people are desperately looking for a millennial "blow-out Holy" war and if it doesn't come their way they will create it

To tell you how serious a problem this is, one of my top secret witnesses, who did not get to testify in front of the members of Congress in a meeting that Cseti set up in 1997 in Washington because at the break he was asked to leave and his handlers (intelligence) that he had worked with years ago emerged and basically took him out to the country-side in Virginia where he was held until about midnight. But what he was going to tell them and this is why he was taken out of the meeting. This military witness had been a contract intelligence worker for the Air Force and for other entities back in the 80's and he sat in on meetings at which plans were made to utilize alien reproduction vehicles, things that looked like Et Crafts, made by a consortium of companies in the United States, Northrup, Lockheed, Martin, Saic and these assets in a horrific plan that exists (that could be activated at a moments notice) would be made to activate a simulation of an Et attack on our assets, in other words they would be used to attack human assets made to look like extraterrestrial technology but in reality being run out of a facility in Utah.

Now here is the punch line, WE ARE VERY VULNERABLE,; our leadership, the security council, the UN Security council, the joint chiefs of staff, all these people I have been meeting with are very vulnerable to a surprise attack from what looks like extraterrestrial assets but in are the human assests being used to look that way.

Now this is very important, because if this is the case and I have multiple people now that confirm that that capability exists and the agenda exists to do this, what that means is an "Independence Day senerio could unfold and it was humans trying to get the world on a war footing against the real extraterrestrials and it is very much what we did in the Gulf of Tonkin during the Viet nam war where we simulated attacks on our own ships in order to get more funding for the war. This is very dangerous because you have a small group people who do have access to these events to fool world leaders.

Dr Steven Greer

Interview Dr. Steven Greer
December 16th 1999

part 2

For example the energy and the propulsion systems which could replace all the sources of pollution in the world but would also terminate the oil and gas industry

What you see is that there are huge vested interest that would take the UFO subject and have taken out of the normal governing process. So key point here is that the "government:" that people speak of is for the most part totally oblivious to this issue and one of the things we have done is collect the best evidence and top secret witness testimony and put those into assessments which you can find on our web site [HHP/www .Cseti.Org](http://HHP/www.Cseti.Org) and brief these members of our government and encourage them to get control of this issue.

Of Course That dependent on their level of courage and courage is in short supply and in the political and military establishment I think the mantra is CYA.(Cover your ass). This is a high risk area and only a few of us know how high risk an area this is...if you have been in a "line of fire "and members of Cseti have gotten to the president over a five year period and given very detailed briefings and things have been handed to Tony Lake, head of the National security Council, Dr jack Gibbons, the physicist who is the president's science advisor and as I mentioned I have personally met with numerous members of Congress including chairmen of committees.

If you see our web site, you will find April 9,1997, we had a briefing for 30 congressional offices where there were several chairman of committees including Congressman from Indiana Dan Burton who is chairman of the government Reform and Oversight committee(I am giving you a name here not mentioned before) and he single handedly could hold hearings. He wanted everything we had on the subject. He is one of the major players.

Now what's interesting is what is happening about this is that these key players have been imitated or somehow scared off from doing the right thing whether holding an hearing or setting up a presidential meeting. The United Nations had promised us a space at which we could hold a disclosure conference where all these hundreds of witnesses and evidence could be presented to the public in a very serious form and they either pulled back

because the people in the secretary general's office that we were working with were either approached by US intelligence people were essentially warned away from the subject and told to leave it alone. That had happened in May of 1997 also.

We have been around the block. This is an incredible story. It will make a great book someday.

.Paola: This seems to be the beginning of serious study so I think that there has been too much science fiction connected with this and it clouds everything else . There are too many amateurs in the field confusing things

GREER: This is one of the problems and that's been done intentionally , For example, the abduction phenomenon is mostly a human phenomenon of military related abductions and everybody knows it. What is interesting is that you have a phenomena that you cannot control and one of the tenants (rules) of Counter INTELLIGENCE operations is to create a phenomea that would be confused with the actual phenomena which would contain the message that you want to control.

So for example if you have an extra terrestrial phenomenon which is ongoing and becoming very intense as the world goes through the convulsions of change which it has in the twentieth century leading to a time when we will have a peaceful world civilization which is our future and destiny without a question . What happens is that people who want to ridicule it will take the subject and will then begin to replicate or to hoax aspects of it which then contains a message which conveys to the public the message which you want them to become convinced of which is very different from what the real phenomenon is saying. In this case you have militarists and military industrial sector moguls who covertly have utilized and reverse engineered extra terrestrial machines,,,spacecraft..and come out with creations on their own but in doing so ,they have also figured out extraterrestrial systems which are very sophisticated electronically that interface directly with the mind and the thought and if you figure out all this stuff and (by the way we have been studying it for 60 years the thirties when the Nazis acquired one of these things in the north of Germany)...what you end up with the ability to simulate or hoax an extra terrestrial event and have it look like an extraterrestrial event but totally run by humans, Now the purpose in doing this is to hide the real phenomena. It has in a sort of message or spin that they want to convey. In this case they very desperately want to convey the sort of very evil senario a la independence day or "the x-files"

because what they really want to convey is a phenomena which requires multi trillion dollar military reponse in the next century.

See what you have to understand is that everyone with an I Q over 40 knows that the with the weapons of mass destrtuction (biological, chemical and nucleur weapons are not that difficult to make) proliferating, we have two choices, we are going to have to develop a peaceful world civilization or we are going to destroy ourselves. Those are our choices.

Paola: Let me ask how can the Peaceful world situation occur with the militarization of space unless we have a common enemy?

Greer: You are suggesting an important link.They are trying to supplant international conflict with interplanetary conflict. And the Interplanetary conflict would enable them to unite the world but instead of uniting the world around some positive sense of the humanity we all share, it would be united around anoyher thing to hate. another empire to fight. In other worlds, another evil empire,,instead of the Soviet union it would be able become something in outer space and by the way this is very lucrative, the whole" cold war" was a blue light special at Kmart(Robba da vendere a buon mercato)

So what you have to do if this is your agenda, by setting up a mass pop media mass disinformation outlet which pervades the public a sinister and frighting threat from space you begin to fulfill what Ronald Reagan in the United nations back in the 80's" wouldn't our task of united the world be easier if we had a common alien threat to unite against? If the president of the United States said that, he was being being manipulated by people whowantedthat kind of bent put on the extraterrestrial issue, because it subserves a number of long term agendas, not the least of which is catapulting the currently one trillion dollar military industrial sector in the world into a space based operation which then becomes multiples of that
