Was instructed to contact homeland security project blue in relation to my situation as I understand it. Likely the result of special access programs, misidentified for termination ended up liberated. Life destroyed. Name [REDACTED] requesting Legal representation under recent legislation for immunity with clearance. I don't understand what is going on and have no enemies. I don't seek to create further divisions and await appropriate authoritative out reach. I was spared for a reason. My experience is damaging to public stability and safety I don't wish to use it for dumb faction warfare only move on from a life of compartmentalized secrecy and slavery as result of secret wars and histories. The government is the only people that can help, I am tired of the mk fuckery threats and actions being taken against me. I seek counsel and representation, immunity and safe passage.

[REDACTED]
