**Steven M. Greer, M.D.
International Director**

15 October 1996

Dear Mr. [REDACTED]

Thank you for the documents and information related to the unusual events at Fort Benning GA.

My best educated guess on what happened to you and your Delta company, given the limited data and witness testimony available at this time, is that you were part of a covert weapons system test.

I have interviewed other witnesses who have confirmed that exotic 'non-lethal defense' systems exist which interface directly with the human mind and which can simulate an alien encounter (aka abductions by UFO subculture enthusiasts). It may be that you and your company were part of a testing of such systems, along with (or motivated by) testing of biological warfare capabilities.

You must understand that there has been nearly 50 years of reverse-engineering of extraterrestrial exotic systems, and some of this research and development has resulted in covert USAP related capabilities which interface directly with mind, or human consciousness. It is likely that such systems would be tested, from time to time, on humans, both civilian and military, to evaluate their effectiveness. I suspect, but cannot prove , that you and Delta company were such experimental subjects.

Thank you for sharing your case and documents with me. I hope we can meet in person soon.

Sincerely,

A handwritten signature in cursive script, appearing to read 'Steven M. Greer', with a long horizontal flourish extending to the right.

Steven M. Greer M.D.
Director of CSETI
