>I hate writing letters like this because they are so discrediting. In
>1977 I was one of a group of people in Phoenix Arizona that read through
>a truck load of government documents that had been removed from the
>government under orders of Nelson Rockefeller because Jimmy Carter was
>about to take over as President of the United States.

>
>A small portion of these papers and files were on what we now call the
>crash at Roswell. It was not really a crash they had shot at the craft
>monitoring the test at White Sands and hit it with an anti aircraft gun
>shell. This put a large hole in the bottom of the craft off to one side
>and the craft took off and later crashed on the ranch leaving a wreckage
>trail over one mile long as it tried to land. This crash site is where
>much of our technology comes from. Like computers and super conductors.

>
>I went to the FBI in 1991 and started working with them about the
>information contained in these files. The DEA who in these files was a
>covert operation of the CIA later obtained a warrant against me and
>injected two CIA designed implants in my neck not far from the vagus
>nerve to torture and control me. One implant was injected on each side
>of the neck.

>
>The FBI told me they could not remove the devices and that I would have
>to file a civil suit. My lawsuit is case number C [REDACTED] S
>reassigned to RCB and is filed in the Federal District Court of Arizona.
>We are now preparing for the 9th Circuit Court of Appeals.

>
>The FBI and the other agencies stopped the many assassination attempts
>against me and the attempts have stopped. I'm still under torture but
>the torture modes and strength have been dramatically reduced. You may
>contact me if you require information. Thanks [REDACTED]
