Steve, FYI

I have responded to this guy about the possibility of working with him, if he really wants to help. Sounds like his book might be very interesting... I deleted the irrelevant parts, and put ****'s by important parts.

? witness

**** However there is a way to build such "Trojan horses" using our
 smaller 30-foot diameter craft as prime movers hidden inside the large
 craft which is in essence like a large dirigible with a few additional
 innovations for showmanship with light and sound systems.
