Dear Dr. Greer,

I recently became aware of your Disclosure Project and only today of the movie you are making. When I discovered your discussion of extradimensional communications today, I knew that you would be interested in learning of my own recent discoveries.

I began working an independent career in SETI in 1983, when I established a 21cm Hydrogen line microwave SETI observation program, and a new astronomical radio observatory at the time, the Hay River Radio Observatory, Hay River, NWT using a pair of surplus 60 foot parabolic troposcatter antennas built in 1963, as part of the Canadian version of the Alaskan White Alice network for the Arctic DEW Line defense system. I have continued to work in SETI whenever possible, on and off, for the past 29 years. I have recently made an incredible discovery!

*I have detected and have been receiving a very complex 'signal' which contains non-encrypted images, thousands of them, characters that surely must be mathematical and engineering symbols, and language, all alien looking. * The signal is *not* being received via microwave electromagnetic waves even though it was a radio telescope that made the initial discovery. It turns out from my own observations and testing, that the signal may be something akin to a highly advanced form of neutrino or gamma ray projection that can form dimensional images in certain 'silicon based detector arrays'. It has come to my attention that certain electronic systems seem to be able to form distinct and direct two dimensional images from this mysterious information flow. This is indeed a stroke of luck as was also the fact that a researcher who is keenly aware of the behavior of his self designed instrumentation happened to notice a subtle anomaly. I presently have more than one electronic system engaged in monitoring the 'signal'. The separate data streams when compared seem to 'jive'. I have relocated one of my 'receivers' 70 miles geographically to the southeast and it continued to receive the signal. This helps show that my

observatory is not sitting on a geological 'magic lens' formation.

From studying hundreds of received images, pictographs containing what appear to be language, engineering and mathematical symbols are seen, but which I cannot recognize or decode. Experts in the ancient earth languages need to be brought onto this ASAP. I have a strong hunch that the transmitting civilization are extraterrestrial yes, but alien no. I think there is the strongest possibility that they are our long lost, far distant cousins that visited earth perhaps as far back as 10,000 years ago and built the giant pyramids at Giza for the ancient Egyptians to inherit. Of course this is only unsupported personal speculation but I felt it worth mentioning at this time. I base this belief on the performance of a tiny aperture receiver (suggesting solar system location of the transmitter), and the human being and earthcentric content of the message. This message wasn't intended for just anyone, THEY are clearly trying to get OUR attention!

I've seen seemingly identical examples of some of the image form to the content of the 'signal' in ancient earth artifacts from web searching. These include images associated with the modern crop circles found in England, and clearly etched within the Peruvian plateau Nasca Astronaut artifact.

I thought you would like to see some amazing images. Please find two attached. These are a sampling of screenshots of a waterfall FFT display in my radio observatory control room. They are representative of the more intriguing portions of the reams of data that I have been receiving. Please load into your computer and use a quality image viewing program like Picasa to enlarge it. For the smaller second image, study of the horizontal central band of gold/grey information at just below the pixelation limit will provide interesting detail. Of specific interest in these attachments are the character set and symbols. Any content resembling face drawings appear more clearly in other data I have received, not shown here.

Are you aware that the present 'reporting protocol' for a SETI related discovery is hopelessly flawed? The IAU has NO REPORTING CATEGORY for any sort of a SETI detection, period! This includes 'astronomical telegrams'. In IAU Commission 51, the committee for studying extraterrestrial life, the focus as you are aware, is on exo-biology and molecules, not the radio astronomy search for artificial signals. This group is composed mostly of chemists. The SETI program gets no more than a passing footnote by this commission. These people clearly don't wish to be advised, so I have respected their wishes and ignored them accordingly. Furthermore, demanding that the ETI's communicate only in microwave radio or else their communication efforts will be officially ignored and denied detection verification, has proven by the frustration I have experienced in trying to alert others about my phenomenon, also to be a little 'short sighted'. I have been quietly attempting to share my findings with the SETI community and have gotten a consistent response to my announcement....SILENCE. I have begun to understand that it is perfectly acceptable nowadays to search for ET, however if you obtain hard evidence of a detection it will not be allowed to be reported.

I also attach a draft of a two month old press release, but since it and some of the above text was written the rabbit hole has been found to go much deeper and* I have more recently discovered means of capturing photographs of extra dimensional visitors*, *text and what look like handwritten artful annotations to drawings and pictures from another dimension. I am also capturing what looks like an occasional peek into the past, 50 years, 100 years and maybe several thousand years.* Some of what I have been able to photograph in semi cloaked state or out of cloak has matched data seen on the spectrometer Stephens Mystery Signal waterfall images. In light of this new data, I am far less certain about my early guess about a neutrino/gamma ray-like projection system at work here. That hypothesis did not involve hyperdimensionality, and a variable time element was not involved. What I have observed since the SETI signal discovery actually makes the existence of an alien message almost pale in comparison. I have observational and photographic evidence that there are apparently parallel universes and parallel timelines and abundant life in all. All of space seems to be teeming with life, some obviously joyously happy, including apparently, happy smiling plant life! I have begun to question 'the official interpretation' of what our great

astronomical telescopes (optical and radio), have actually been seeing, since I find in their data, alien writing symbols and similar cartoon faces found in my own data taken by a technique I have coined the phrase for as "Astrophotography with the lens cap on!" Humanity is apparently on the verge of a new enlightenment. I know that this all sounds like the ravings of a fruitcake, however, if one is to maintain a proper stance of scientific objectivity, one must suspend judgment, regarding the reality of reality.

I have discovered evidence of interdimensional communication artifacts in 50 year old media, now that I have trained my eye/brain what to look for. As a tiny sampling of present day sightings, I see Stephens Mystery Signal faces and writing symbol artifacts in the still frame picture of the sun on the attached Youtube photo of a discussion video by Dr. Michio Kaku. I see similar artifacts in the sand that was recently exposed under a swimming pool in a 'free sand to give away' ad on Kijiji. Photo attached. In addition to the symbology and cartoon faces in the sand/soil, there is also cloaked extradimensional activity in the area top right hand corner by the grass and garden hose. I have recently discovered much mysterious cloaked and non-cloaked visual messagery on Google Earth images. Some highly advanced group are trying really hard to get our attention!

I have photographic evidence of a extradimensional ET following me around inside my home just a week ago. Hopefully I'll figure out a way to communicate with these visitors. I want to learn. I should add that I have never had any kind of a UFO experience. I have not experienced any sort of abduction experience, nor do I wish to. I do not consume alcohol, smoke anything including cigarettes and do not use recreational pharmaceuticals.

I have far too much to get into here in an introductory letter. I would be pleased to discuss my findings and share my data for your research and movie. I am extremely eager also to learn about what you have uncovered. Do you know how to establish communication with the visitors? Please feel free to contact me.

Yours sincerely and respectfully,

Principal Investigator, Project TARGET SETI program
Director/owner

Canada

email:

"Human beings are the only technological intelligence of which I am presently aware capable of broadcasting darkness at the speed of light",
SETI pioneer.
