UFOs are no Threat

English subtitles

I am [REDACTED] of the Association "[REDACTED]", also a professor and a member of the Presidium of the Academy of Geopolitical Problems. Well, and a small reference: I have been dealing with UFOs, other anomalous phenomena, so to speak, and considering the circumstances associated with this, since 1976.

I would suggest putting the question in a following way: people should demand that their governments sign a comprehensive and unequivocally prohibiting law – not even a treaty, but a law – on the non-placement of weapons in outer space.

Because outer space is not a place for our human indulgence! We bring, or want to bring to it, to this Cosmos that does not belong to us, our mores, our negative, so to speak, sides, which in space do not simply give the possibility of survival. And we want to bring it there, while talking about aggressions that just didn't happen.

I must say, referring to the so-called effects of UFOs and cases where people or equipment were affected, and so on: honestly, if you analyze these cases when a plane suffered, or, let's say, ships, something happened to people – it happened upon the elementary ignorance of the safety of communication with others.

It's just that we don't know yet the deep, fundamental physical laws that they have already mastered. They move according to these laws, disappear from visibility, become visible again, and so on... We do not yet know these fields, we do not know these vibrations, we do not know the frequencies, the spectra, we simply do not know this, and therefore we behave incorrectly when, for example, we approach a UFO, or when some plane catches up with a UFO...

So, these are not acts of aggression!

Or, simpler than that: a UFO hovered over an American base. Is this aggression? Where are the non-peaceful, hostile actions here? This is just curiosity, this is control and, by the way, a control, which in some cases is very effective and, thank God, correct!

So, I call on all people of good will who just want to live on this planet to join their voice to the demand from governments to conclude such Treaties that would not allow any weapons to be placed in Outer Space. This is number one.

And number two is keep in mind that in the month of June, this so-called "Last Card" may begin to be played, which can lead to the death or suffering of the vast majority of people.

We must not allow this to happen! We should not consider representatives of other worlds, civilizations as hostile! We must change ourselves. All religions have called us to this, and our

outstanding compatriots – [REDACTED] and
many other thinkers not only in Russia, but also abroad have called us to this!
Let's live on! Thank you.
