Dear Steven ,

On 28th of September I came back from more then one month expedition
took
place

in Yakutia,Russia. It was pre-expedition and it was successful.

For the first time we have got in our hands

"Installation" that belongs to extraterrestrial technology and which
is

working

(active) now.

During this month we checked the areas by all possible means and we
have

found

such "Installation" in another part of world.

The results of the expedition are dramatically interesting and
important

for our

civilization. We discovered the mystery of Tunguzka case with
explanations

of

any details that were mystical or mysterious for those who
investigated the

case. Very soon I will write complete material about this.

Few days after the expedition I spent in Moscow with my friend

General-Major

[REDACTED] (Ministry of Interior), deciding what to do with our findings.

All of us clearly understand that the finding can serve weather for human development or for another round of military weapon development. In this particular case (in Russia) I do not afraid militaries I do really afraid politicians who can start making their political dividends using this reality and extraterrestrial technology.

Inside of my heart I deeply feel we should do something together simultaneously in Russia and in US to avoid any possibility to use the presence of Installations by all possible means against humanity.

Any of your ideas concerning the destiny of Installations will be more then

welcome.

By the way few month ago I did sensational interview topmost secret person in

former Soviet and now. His name is General-major [REDACTED] and he is active in The Center for Space Communications in Moscow. His real position

I cannot announce (it is secret). He said a lot of interesting things. This is

the best interview I have ever heard. Keep it in mind.

Rememeber to all my friends.

With best regards

[REDACTED]
