Subject: Eye Witness

Dr Greed, (should be Greer. -ed)

I happened on "The Disclosure" site through the [REDACTED] e-mail newsletter.

The sincerity therein prompts me to contact you. I will be as brief as possible.

Some years ago while in the military, my wife and I had a broad daylight close up encounter with a large metallic low flying craft of an unidentified nature.

With some slight differences It more or less looked a typical UFO as seen in movies

and pictures. This happened in a semi remote area of Texas near sheppard AFB at

Wichita Falls. The event itself of course got our full and undivided attention. My wife

and I were stunned by what we had seen and decided never to tell anyone.

We

kept that promise for years.

Then, a subsequent event years later, at the same location, one which I believe to be a

direct result of that first sighting, and if correct, leads me to consider the frightening

possibility that we may no longer be at the top of the food chain. Anyway the thought

was enough to frighten this old soldier and I hastily departed the area..

The secondary event worried me to the point of looking up some UFO research

organizations, one of which I casually contacted much as I am doing now with you.

They asked me to tell them what had happened and that they would get back

7/8/02

with me.

I carefully completed their "sighting form" and mailed to them by registered mail.

I never heard from them - not even an acknowledgement of receipt. Hmm! That was two years ago.

Considering the possibilities of what that meant only served to frighten me even

more. After that, I told the story to a few close friends. They believe me but feel as I.

Who would one report such things to? Further who would believe you? They are no

more knowledgeable of such things than me. Should we just wait and see what

happens, if one can see such things happen.

"The Disclosure" site appears to be knowledgeable of and genuinely concerned over the

presence of unidentified craft in our environment. If my rationalization of what I observed

is correct someone aside from myself and way above my pay grade should be in the

knowledge loop. There is also the possibility that If I am correct, after so many years, it

may not make any difference. I will certainly feel better for it though and meanwhile a few

of my close friends and I pray that what I observed was just a coincidence of major

proportions.

If you are interested I will send hard or e-mail copy of the form I submitted to that other

organization. I of course would appreciate an acknowledgement of receipt and any

comments you might like to express to me but my main purpose in contacting you is that

if I am correct in my assumption, the information might at your level of influence make a

difference. There is nothing I can do or change about events past or future - my wife and I just happened to be the unfortunate observer's.

This turned out to be a lot longer than I originally planned. However; I thought that some attention to detail was necessary. Please accept my apologies,

Aloha

Honolulu, Hawaii
