Mr Greer,

I've been following you for quite some time. As I'm listening to the show, I heard your request asking for people to step forward. I would love to do that. During my time in the military, (17 years), I've seen "things" in both the Mojave and desert in Iraq. The last 8 years I served as a 35M48N7. Humint / Intel collector and certified strategic Debriefing. I love timelines and talking to people.

I worked at HTJCOE in fort huachuca (again have seen things I couldn't understand at the time) as a contractor for Raytheon as a training and development specialist. I was a DSDC instructor/ role player.

If there's an opportunity to join your team in however I can help - I'd be more than willing. I'm semi retired from the military and spend my days researching this stuff.

I've read the gateway report and have practiced the gateway/ astral projection etc. on a more personal note - I've also experienced a Near death experience - and I'm going to be brutally honest - I've also experienced a full on breakthrough/mystical experience as well.

Needless to say my life has been profoundly changed. And I'd love to turn this into a new passion and purpose. I've held a TS/SCI/HCS/TK as well. And have worked with some amazing people from SOCOM as well.

I would love to discuss this in further detail with you if the opportunity presents itself.

I absolutely love your work and the topic. So anything I would do - wouldn't be work.

Thank you for your time.
