Yeah, I will file it. Maybe it could collaborate evidence down the line for someone else.

Definitely a credible account. Now quite sure what to do with it as not sure it warrants trip to DC and AARO

Dr. Greer:

My name is [REDACTED] was stationed a Ft. Hood/Hood Army Airfield in 1993-1994. I passed an SSBI and held a TS clearance. I was an armament guy for the Army's OH-58D Kiowa Warrior. In the summer of '94, myself and two friends were in the town of Coperas Cove, Tx. It is the location of Richardson, or Robinson AFB, I can't remember for sure. We were outside "smoking and joking" when four blue pulses of light came from behind me. I thought it was a police car. My friend, Mark Kelly Cromer's mouth gaped open. I heard the neighbors scream from the other side of a privacy fence. I turned and saw something the shape of an elongated pyramid, shrouded in something similar to tv snow. It moved slowly and appeared to be large. It drifted out over a hill and came to a hover. It set there for a moment and steamed off faster than anything I've ever seen. The two witnesses and myself were not drinking at the time.

I called our flight ops at Hood Army Airfield and inquired about the radar signature... nothing. I called the AFB the next day, they transferred me to some kind of aerospace center located there. They took detailed notes on my observation.

Full disclosure, I was having marital problems and facing a 14 month hardship tour to Korea. My wife couldn't come and dealing with that and my childhood abuse I was seeing a psychiatrist. No mind altering drugs were prescribed, However. Less than a few months after my observation and persistent questions over what I had observed they chartered me out of the Army with a "personality disorder".

Shortly after I received a waiver and re-entered service in the Georgia Army National Guard. I have been a successful power plant operator for 22 years with Southern Company, so I am not a loon.

Completely silent propulsion systems and an "active camouflage system" is beyond my know realm of possibility. I have been convinced since that day it was extra terrestrial. Not until the [REDACTED] Show did I question this. I am not an eye witness participant in a secret project, but a witness to something [REDACTED]

[REDACTED] will not talk about to this day. I can't tell the story in his presence. The full names of my friends are [REDACTED] [REDACTED] now residing in [REDACTED] no longer have their phone numbers. I included my full name and social to prove identity and my location at the time.

If this information is not relevant or worthy of archive, please destroy it.

Sincerely,
