

28 February 1987

Mr. [REDACTED]
[REDACTED]
[REDACTED]

Dear Mr. [REDACTED]

Sir, I am writing to you because of your research (see enclosure I-I3) into authenticating the "SNOWBIRD" document.

I am the individual who "leaked" the document into the Aerospace industry (see enclosure D5 page 2). I believe now that I was provided a copy of this document (see enclosure B2) because of my former association with the U-2 Project (see enclosure K-K4), former association with the Hycon Co. (see enclosure L3), current interest in the alleged USAF/Lockheed F-19 stealth fighter (see enclosure M-M8), and research into the "Roswell Incident/Blue Room" artifacts (see enclosure N-N7).

In sharing this documentation I make a request- The facility (Mount Monzano see enclosure O-01) that [REDACTED] is in charge of guarding, is alleged to have a down-link communications center for the "Aliens" (see enclosure B2). There IS a red light on top of the hill above this facility that ostensibly blinks in unison with "their" coded communications patterns. Can you confirm this?

Thank you for your time, Sir.

Sincerely,
[REDACTED]
[REDACTED]
[REDACTED]

Assesment of Purported "TOP SECRET" Document

The document in question is purported to be one (1) page of a larger document. This one (1) page purported leased VIA the Freedom of Information Act. The document does not contain any reference as the office or agency of original. Also, the document is undated.

The document is marked TOP SECRET at both the top and bottom of the one page. This is consistant with existing DOD and Departmental Regulations and Directives.

X The words "TOP SECRET" at both the top and bottom of the document have been over stamped "UNCLASSIFIED" indicating that the document was in fact downgraded for released. NOTE: The original classification should have been crossed out upon downgrading. However, this oversight is common as proven by other document I have obtained VIA the FOIA.

The document is also marked, "Sub Projects under Project". Within the Intelligence Community there exist such requirements. However, it should be noted that the use of such markings as "Sub Projects Under Project" are not common Knowledge.

Each of the paragraphs on the documents have the lead line, "(TS/ORCON)". This indicates the classification of the project (TS - TOP SECRET) and also the name of the project (ORCON). It should also be note that again this is not common knowledge outside of the Intelligence Community.

Each project named in the document is followed by a "PROWORD". Again this is not common knowledge outside of the Intelligence Community. A proword is a word or group of words to identify a transmission of information pertaining to a project. In exsample if information was being transmitted concerning a Project Blue, the proword might be dark. You would want your proword classified so no one would know that that information pertained to a certain project.

X The document is double spaced. This would indicate that the document was in all propablity a draft document.

PROJECT SIGMA according to the document deals with our efforts to communicate with the "Alien". SIGINT within the Intelligence Community deals with Signal Intelligence. Therefore, it would not be unreasonable to conclude the SIGMA would signify, "Signal Intelligence with Alien".

CONCLUSIONS

While the document does not contain sufficient identification to permit any opinion as to its authenticity, some conclusions can be drawn. To date no governmental agency has confirmed the document as being valid. The document does seem to indicate that the document conforms to the accepted standards of a classified document in accordance with DOD Regulations and Directives. Also, if the document is in fact a hoax, it would have to have been committed by someone having a high degree of knowledge on how the military classification system works.
