

CONFIDENTIAL
COPY FOR YOUR
INFORMATION

[REDACTED]

March 23, 1987

Dear [REDACTED]:

Before responding to your letter of Mar. 16, I think you will be interested to learn that your good friend Lee Graham is circulating letters and papers from the Defense Investigative Service (which was investigating whether or not to lift his security clearance) which make serious allegations about you: Graham's letters and DSI papers quoting Graham claim that:

- TAUR (1) You were the previously unnamed source who provided him with the partially censored version of the "Project Snowbird" document, stamped "TOP SECRET".
- NOT TAUR (2) You allowed him to read the full (uncensored) version of the same document.
- TAUR (3) Graham told DIS that he "assumed [REDACTED] is an investigator with the U.S. Air Force because [REDACTED] once showed Subject (Graham) some credentials."
- TAUR (4) That you had indicated to [REDACTED] that you "had been approached by AFOSI...to disseminate information to the Public in order to convince them that the UFO phenomena was real and of extraterrestrial origin."
- TAUR (5) You and he had dinner on Oct. 16, 1986, and that when he asked if you had been contacted by DIS you replied that you had not been and "WOULD NOT BE" because DIS's computer system was "flagged not to interview or interrogate him (Moore)."

Naturally I seek your comments. If you were the person who supplied the "Project Snowbird" document to Graham, as he claims, would you care to say how it came into your possession, and whether you believe it is authentic?? (The document reminds me of the sort of bogus papers that "Dr." [REDACTED] used to write and circulate before [REDACTED] exposed him as a fraud.)

While I question the authenticity of the Project Snowbird document, I fully accept the letter from Santa enclosed in your recent letter and can assure you that I will hang up my stocking next Christmas Eve.

THIS
1980
CAME
FROM?

Reference the [REDACTED] book, I have nearly finished my second reading of the book for the book review I will do for Skeptical Inquirer. (Started 2nd reading on the long flight to Europe for a ski vacation in Switzerland and France.) It is a most depressing book which I had to lay aside every half hour or so. I felt as if I were in a mental institution, listening to one of the inmates describe the demons that were eating away his insides. Yet I am told the book now is #3 on the NY Times best seller list. THE FOREGOING COMMENTS ON THE STREIBER BOOK ARE NOT FOR QUOTATION.

-2-

Mar. 23, 1987

Reference the JAL incident, I am quite confident that the single UFO that Capt. [REDACTED] reported seeing in the near broadside position from about 6:48 p.m. was Jupiter. The multiple UFOs he reported earlier were a different genre (as both the copilot and flight engineer emphasized in their FAA interviews in January). But to learn my explanation for them you'll have to read the summer issue of The Skeptical Inquirer.

Were you aware that Capt. [REDACTED] is a FIVE-TIME UFO REPEATER?? Two prior to Nov. 17, and two more on Jan. 11. One of the latter, according to his radio report to FAA, was similar to initial UFO sighted on Nov. 17. But later Terrauchi agreed that both Jan. 11 UFOs probably were caused by village lights reflecting off clouds of ice crystals.

Now about my "change-of-heart" about retiring from UFOlogy. I have a confession to make: this was a test of your ability to discriminate a tall-tale from fact, i.e. a test of your credulity, as I informed [REDACTED] at the time--after first swearing him to deep secrecy.

My letter to [REDACTED] announcing my upcoming retirement was part of the window dressing. (Kurtz failed to note a P.S. at top of letter saying it was part of a test and called me to ask me to reconsider.)

But in all candor I'm not 100% certain that you were really taken in and suspect that you suspected it might be a hoax.

Reference the Gary Kinder book on B [REDACTED], if I should do a review of that book I undoubtedly would quote from Kal Korf's article some years back in the MUFON journal, as well as your jointly written rebuttal to Stevens.

If you intend to pursue the JAL case, I urge you to obtain the data package from the FAA's public information officer, Anchorage Alaska, which is available at modest cost. Especially illuminating is the transcript of pilot-controller radio communications while the incident was occurring--copy of which I obtained in early January through sources at FAA headquarters. Also transcript of FAA interviews in early January with the pilot, copilot and flight engineer which--fortuitously--were conducted individually and separately so the "lesser" crew members could speak reasonably candidly and challenge some of the pilot's claims.

Sincerely,

cc: [REDACTED]
