

1

[REDACTED]

Dear Sir,

I wrote to you in November 1986 requesting your assistance concerning my interest in UFO's (See enclosure 1). The NSA responded to your request with the attached letter (See enclosures 2 - 4). First, thank you for making the requested inquiry on my behalf. However, I take exception to the NSA's response for the following reasons:

1. Everytime you write the NSA requesting information, they request \$250.00 (which I do not have). I feel that it is in the public interest to get the truth out. Therefore, what better public interest could be served then releasing this information to a member of Congress (YOU). I am once again requesting any information the NSA has on the RAF Woodbridge Base incident. Further, I request that all fees be waived in the public interest by virtue of this information being released through your office.

2. The NSA says they have no record of a request from me concerning the Cuban MIG being destroyed by a UFO (See Enclosures 5 - 8). Does the NSA denied that they were in fact the "agency" referred to in paragraph 1a of the USAF letter dated 15 Nov 79 (See enclosure 5)? What is the truth concerning the Cuban MIG destroyed in March 1967?

3. The NSA Letter states that, "Apparently there is or was an Air Force project by the name (Aquarius) which dealt with UFO's". While, Is or was there an Air Force Project Aquarius as stated in the NSA Letter which deals or dealt with UFO's? If so, is this project classified?

4. I would also like to request that you contact the NSC, NSA and USAF for answers to the following questions:

(1) Why did DIS have such great interest in the Snowbird document (See enclosure 9), to go so far as investigating a [REDACTED] after he came into possession of said document?

(2) Why was Mr. [REDACTED] never questioned by DIS after [REDACTED] had identified Mr. Moore as his source?

(3) Why has the NSA and DIS totally disregarded DOD directives by failing to confirm or exposing as a hoax the Snowbird document, in an effort to determine if in fact there was a security leak?

(4) Does the NSC or NSA have information concerning UFO's over the past forty (40) years, that is in fact classified in the interest of "National Security" and was this information kept from members of Congress during Congressional inquiries concerning UFO's in 1966 and 1968 (i.e. the Cuban MIG being destroyed by a UFO in March 1967)?

1

(5) Once and for all, is the Snowbird document bogus, or a valid document? If the intelligence community has failed to determine this by now, why have DOD Directives requiring this action not been followed (DOD 5200.1 PH)?

(6) If UFO's are not a threat to our national security, then why does every intelligence agency have classified information concerning UFO's; classified in the interest of national security by Executive Order 12356 (keep in mind I have been denied UFO information from these agencies on that premise, stating that the information I requested was currently and properly classified in the interest of national security)?

(7) Considering that UFO's do not represent a threat to our national security, then who is lying? The intelligence community, with classified UFO information or the US Air Force with the Project Blue Book finding?

A Statesman once said, concerning the Pentagon Papers, that a government has a right to lie to its citizens in the interest of security. I feel this is only true of a self-serving government. It can not, it must not, be true of a government serving the interest of its people.

I know I ask alot, but I beg of you sir, please help me to get some answers to these questions. I secinerely feel the American Public has a right to know the truth.

I remain respectfully yours,

24 September 1986 W-TK!

Freedom of Information Act Request
(5 U.S.C. 552)
Defense Investigative Service

Dear Sirs:

Please note your response (see enclosure A), to my request (see enclosure A1).

In the absence of any statement to the contrary, I must presume that I am under investigation for possessing a copy of this document (see enclosure B) for which I DID make a request to you for authentication thereof (see enclosure C).

On September 18, 1986 Mr. Ron Regehr was interviewed by agents [REDACTED] and [REDACTED] representing the Defense Investigative Service. I was present at part of this interview in which (again) questions were asked about this document (see enclosure B).

Mr. Regehr was also asked about a drawing (see enclosure D) I had asked Mr. Vincent DePaula to draw for us. I have alleged that a creature that looks like this was found in the wreckage of a crashed flying saucer which was found in the New Mexican desert in July of 1947. The interest your agents showed in xeroxing a copy of this document (see enclosure A) and in xeroxing this drawing (see enclosure B) has created among fellow workers a feeling that there exists substance to the rumors related to this material. 11/1/87

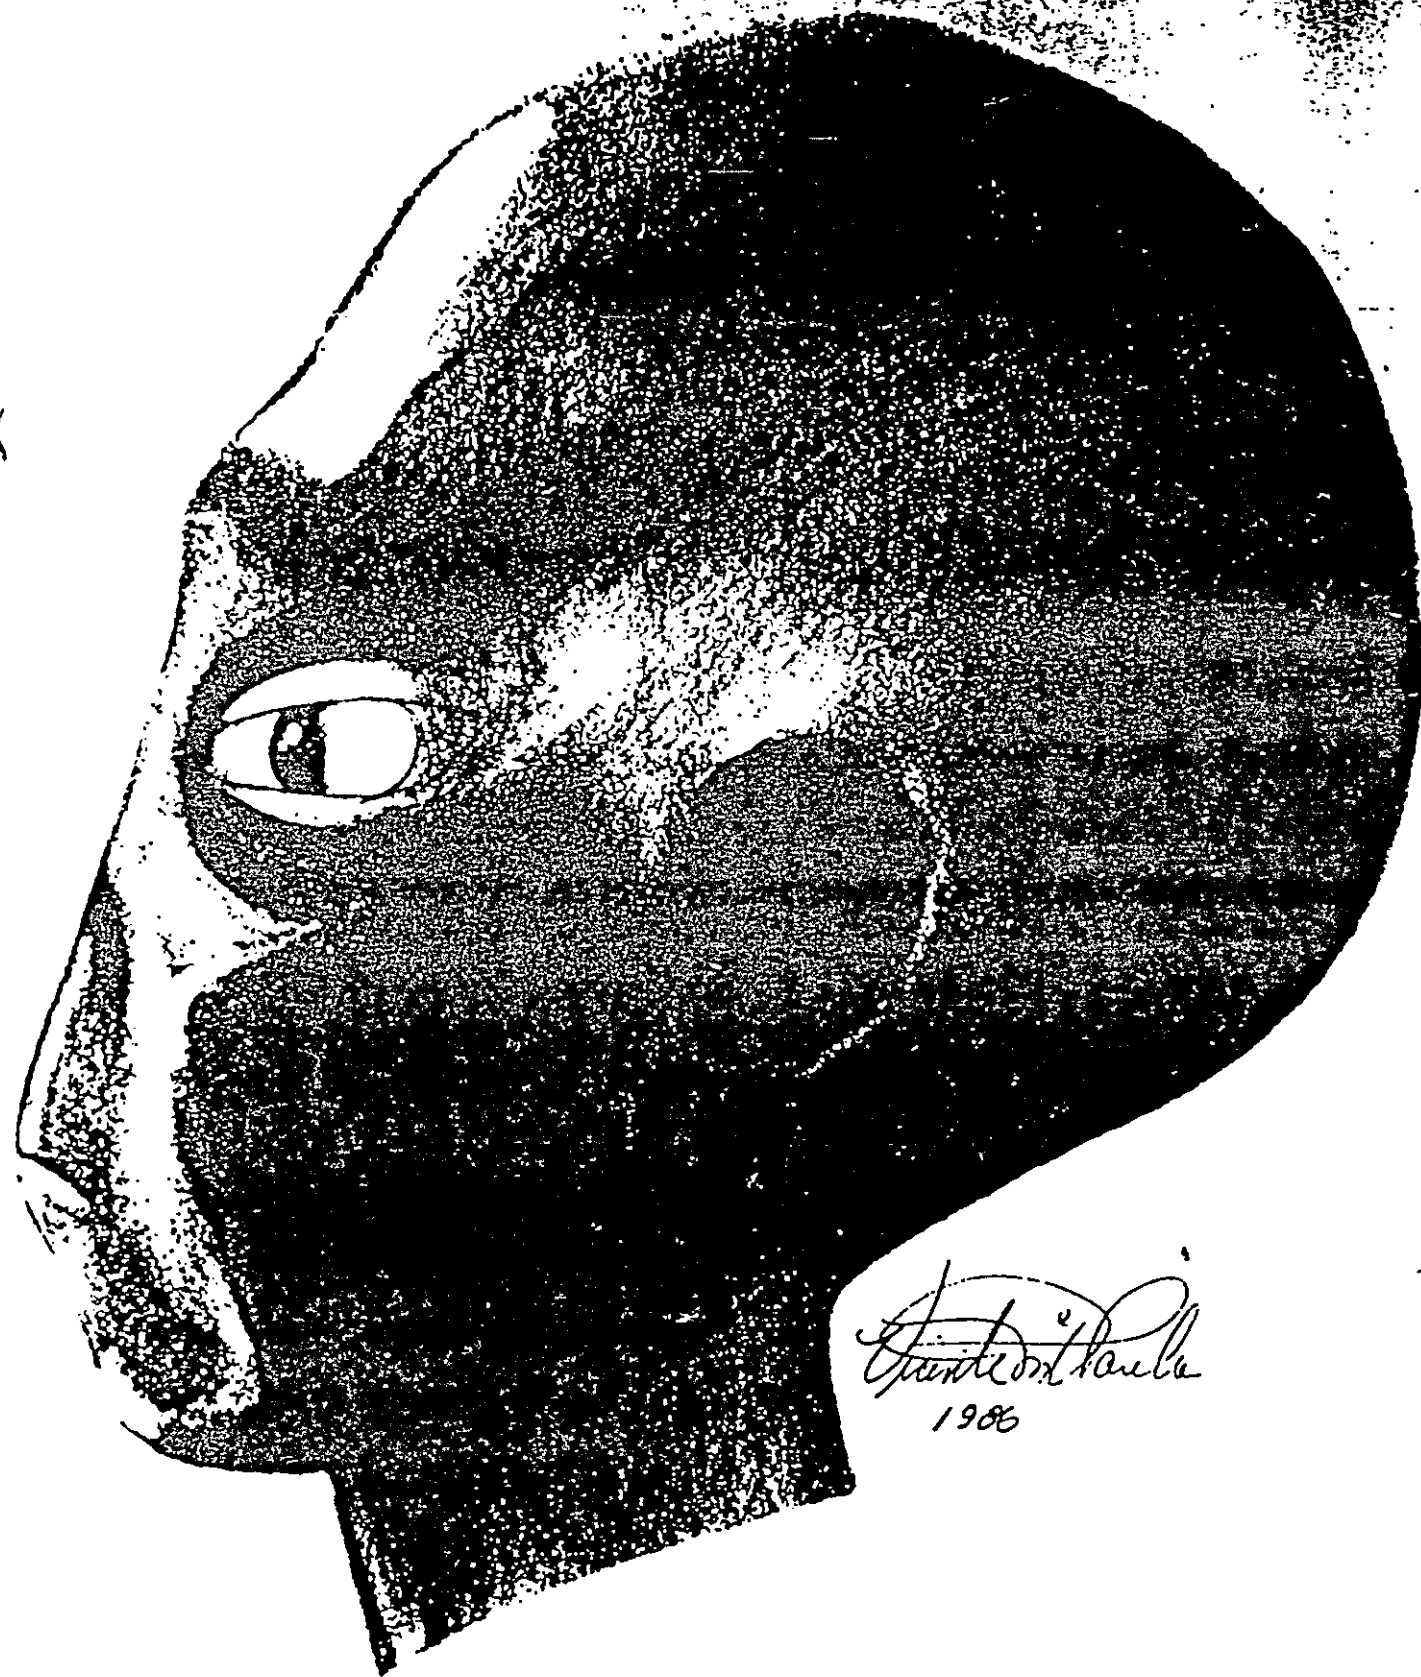

Seeing that it was stated to me by the above agents, that I had already been investigated (i. e. for my part in attempting to authenticate this document by informing you of its existence), I respectfully request-

1. The releasable contents of the file (and purpose for) you having begun such an investigation (see enclosure A1).
2. A complete uncensored copy of the document (see enclosure B), and an official statement as to this document's authenticity.
3. The specific reason why your office is so interested in the drawing of the little alleged Alien (see enclosure D).

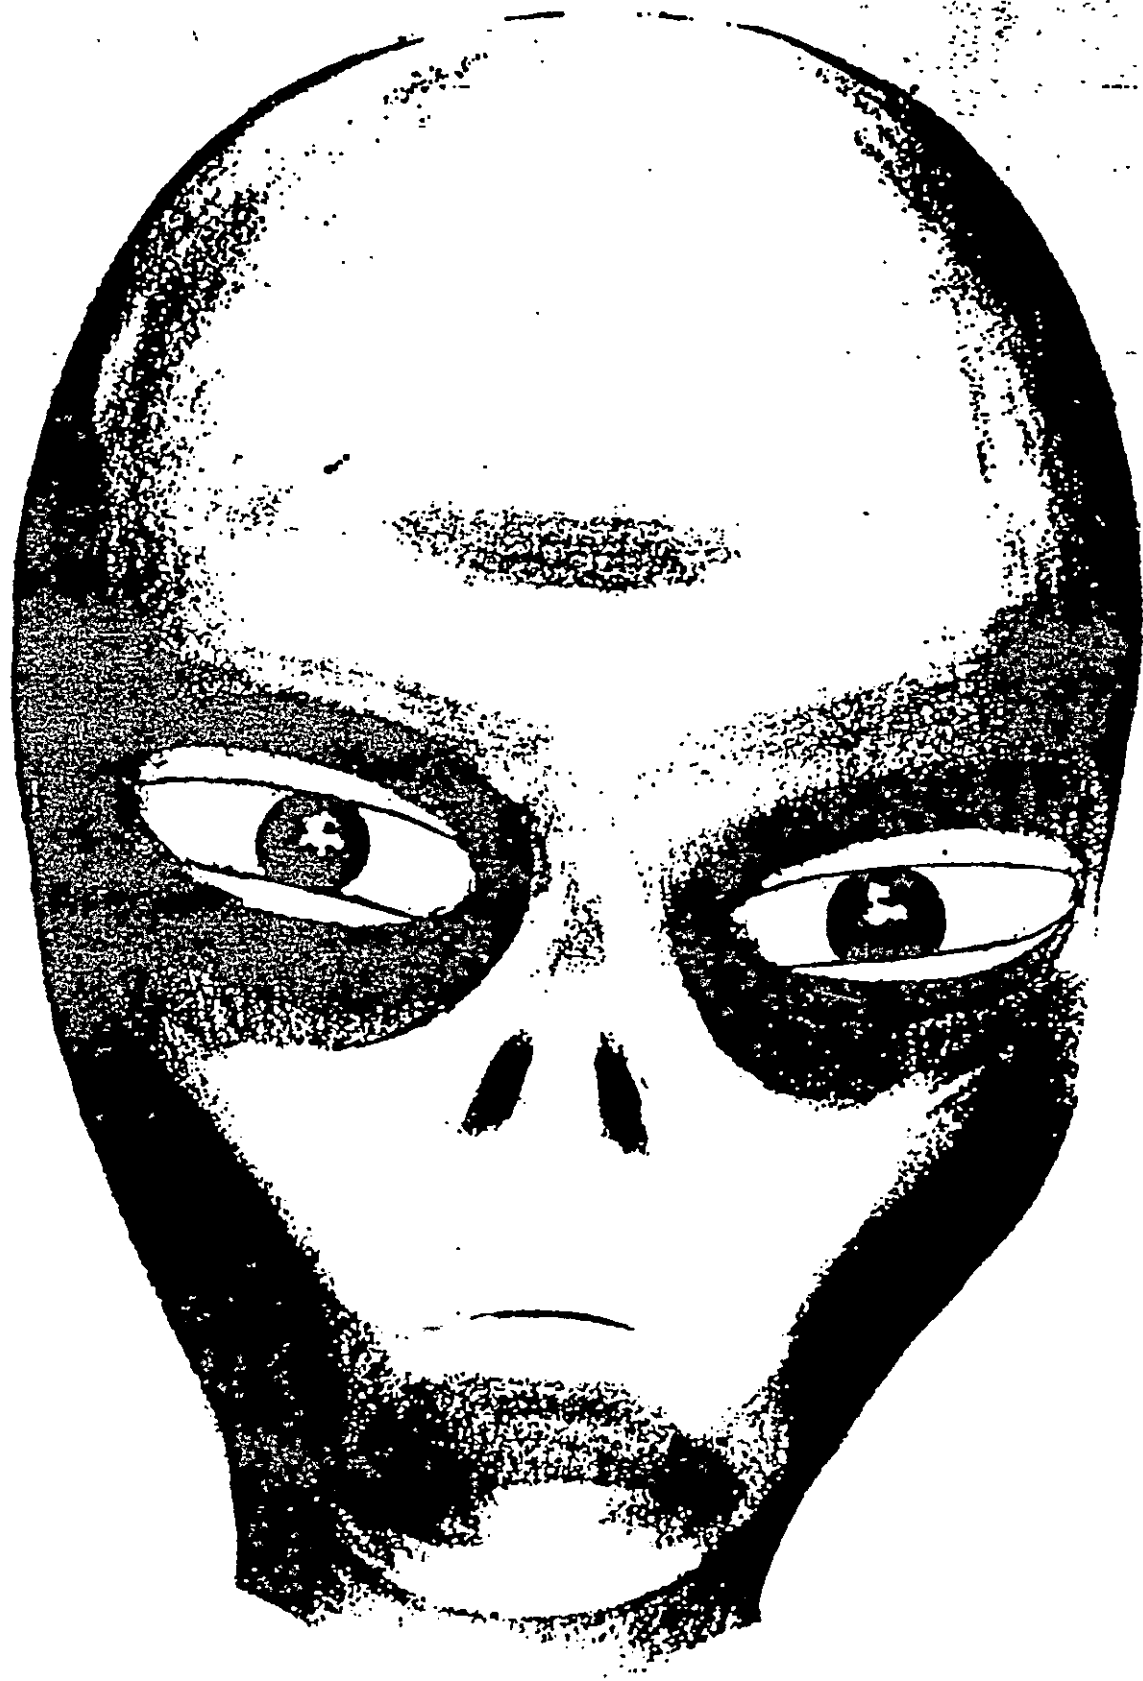

Thank you, for your time, Sir.

Sincerely
[REDACTED]
