SOURCE

In the spring of 1954, I was hospitalized for treatment for: elbow jaundice at a military hospital near the Barrikadi Munitions Works (48 48 N - 44 32 E). On two occasions during the period of my convalescence, I, as well as other patients at the hospital, observed the flight of an unknown object from horizon to horizon, flying from southeast to northwest. This object appeared to be climbing. I cannot describe the object, but as I remember, it took approximately one minute for the object to leave the range of my vision. This object caused a great amount of vibration in the air and made a screeching, whistling noise which was different from the noise made by an artillery shell in flight. I could not see the object itself, but I did see disturbance in the air which seemed to envelop it.
