

A Diplomat's Report to NATO

27A

ITALY

U.F.O. DIVISION OVER ROME - ITALY

An official communication to Dr. Alberto PEREGO, Italian diplomat in active service on his official UFO report, filed with the North Atlantic Treaty Organization Supreme Headquarters in Brussels.

On November 6, 1954, at 12 o'clock Dr. Perego with reliable witnesses from the Tuscolano district of Rome observed an unusual UFO operation above the Vatican City.

At 12:00 a.m. from the eastern direction of Rome, 20 "white balls" (wing force) in a precise "V" formation appeared, and was heading at 7,500 m. altitude toward Ostia. - Exactly the same time in the opposite direction from Ostia, the same force likewise in "V" formation proceeded. When the tips of the wing forces met above the Trastevere-Monte-Mario District, where the Vatican City is located, a regular "GREEK CROSS" was visible for less than one minute. Then the wings separated again in two curves and departed.

The Supreme Hq. letter first paragraph forebodes that in 1954, the UFO forces operation over the European Continent was already monitored by the NATO forces.

(For analytic details see GM page 18, plate 3.)

SUPREME HEADQUARTERS ALLIED POWERS EUROPE

PARIS. FRANCE

28 December 1954

Dear Mr. Perego:

I am directed by the Supreme Commander to express to you his appreciation of your action in imparting to him the interesting information contained in your letter of 14 December. Your letter has been passed to SACM-R's Air Deputy and to his Scientific Advisor, who have also found it of interest and who are taking your observations into account in their respective fields.

Your complete account of your observations makes it quite unnecessary for you to report on them in person, but your thoughtfulness in offering to come is fully appreciated.

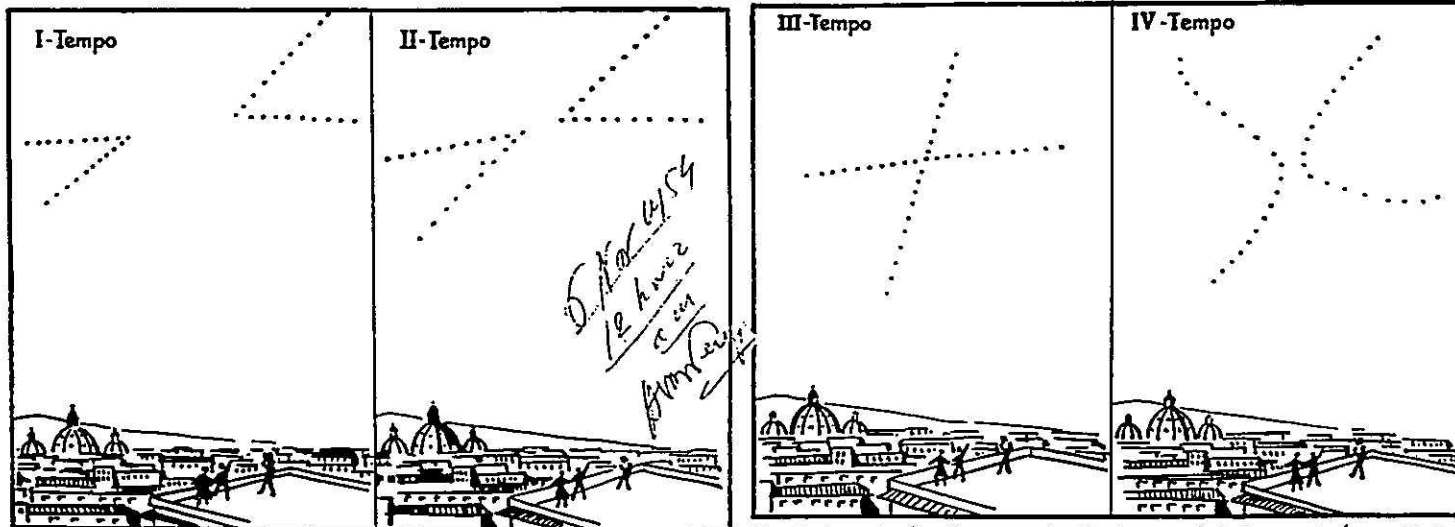

Sincerely,

*He has
