Subject: I need to talk to someone about my experience at Eglin Air Force Base!

To: [REDACTED]

[REDACTED]

My name is [REDACTED] and I'm a veteran of the U.S. Marine Corps and the U.S. Army and the Alabama National Guard. I served four years in the Marine Corps and six in the Army and National Guard combined. I was honorably discharged in [REDACTED]. In [REDACTED], my unit was sent to [REDACTED] Air Force Base for our 2 week annual training. Our unit was a military police unit. We worked directly with the Air Force security forces, which is, the Air Force version of the military police. Our first day of debriefing about the base, we call it, guard mount, we were told sometimes if we patrolled with the marine patrol that sometimes we might have to retrieve "space junk" if debris was found in the water. We kind of laughed at the time. All military policeman have to have a secret security clearance so you can be authorized to guard anything at anytime. One day, when I was riding with my security forces counterpart, we had to take some food to a place called Site [REDACTED]. It is a classified radar site on the base you can also Google. It monitors 70% of what the U.S. can see in space from earth. It can see an object as small as a softball. There is a sign inside the building that says, "We monitor all space activity terrestrial and extraterrestrial from planet earth". I was shocked and my mind started racing because I started thinking about what we were told when we arrived there. I would like to talk to someone about my experience there. Please reply to this email if you are interested in knowing more.

Thank you,
