

Subj: **Witness Report:** [REDACTED]
Date: 9/3/00 1:57:25 AM Eastern Daylight Time

Note: This witness was originally assigned to Will, but Will sent the contact information on to me. He is listed on my Northern CA spreadsheet as [REDACTED] - actually his last name is March.

WITNESS REPORT: T [REDACTED]

1. Obtain full name, address, phone numbers, email and other data and record same

[REDACTED]

[REDACTED]

M [REDACTED]

[REDACTED]

2. Obtain brief educational and employment history relevant to the testimony (ie, government, military, intel., corporate)

Graduate school at University of Pittsburg.

Air traffic controller for the Army specializing in radar, specialist 5th class, E-5 ranking (middle level structure).

Vietnam Vet (after the UFO event). Fall 1971 left army.

3. Record the details in summary form of the witness' testimony, providing salient information on date, location, position and involvement at the time of the UFO/ET event or project

Assigned at Fort Rucker, Alabama. Sometime between of spring of 1969 and spring 1971. Stationed at outlying radar site. He picked up an object travelling at 9,000 mph on the radar screen. There were 3 radar returns. Radar screen spanned a diameter of 80 miles. Asked techie if something was wrong with radar, and he said no.

In 1972, he pointed to the sky and a UFO materialized - a disc that maneuvered at about 60,000 feet. Wife saw it also. He's trained to recognize things in sky.

4. Ascertain the witness' degree of cooperation: Is he / she willing to be interviewed under full identity? Under a disguise (we want to discourage this except in rare cases)?

Yes, fully willing.

5. Ask if he/she has corroborating witnesses to the event or project or corroborating documents and other materials.

None. Doesn't remember name of tech person. Mentioned to others but doesn't remember names. Might have notes on it someplace.

6. Always ask if the witness has other evidence, networks, or contacts to other witnesses which could be useful to the project (they may not offer this and so this should always be asked).

Has a friend/neighbor who was in the Navy in around 1958 – on a carrier working radar. Picked up UFO and sent off fighter planes. Planes tracked it as high as radar would reach: 85,000 feet, way beyond reach of planes, until it left the atmosphere. It was hushed up, he was told to keep it quiet. March will contact the neighbor and see if he will talk to us.

7. Write your own assessment of the value of the witness' testimony and credibility, and HOW the witness comes across (articulate, etc).

He's very long-winded and gets side-tracked. But articulate. Definitely credible. Will need to be kept focused on the answer we want, but I think he could do it. Have to decide whether the trip out to his house with camera crew is worth it - don't think his testimony is compelling enough to justify the trip and expense. (4 hour drive one way) Maybe if the neighbor on the Navy vessel pans out, the trip would be worth it.

8. Let the witness know that we will be contacting him/her later to set up a date to conduct a full interview.

Done. He will be home and available Sept. and Oct.

9/2/2000
