Witness!

Ok I must admit that I was stationed at Eglin AFB in Florida and that the area of Gulf Breeze that has a number of UFO sightings. Interesting stories that say that people have seen aircraft chasing the UAV's is not quite right, if people in gulf breeze listen to the Eglin tower and range ops on Radio Shack scanners they will hear the area being cleared of aircraft and boats in the test area, any time that there is to be UAV flights, these unmanned aircraft not all but quite a number of them come from a hanger in the middle of the swamp on Eglin and this building was built in the middle of the winter of 1971. The hanger shows up on the Spin Two images as a hanger but it has only a large landing pad as in helicopter or vto craft and there is no run way.

I do not want to loose my job but being a Radio Maintenance and Instrumentation technician over the years has put me in some very interesting places setting up radios and telemetry, which also includes much air to ground and ground to air video, the only problem is that I never tape anything that I am not authorized. I do not know how these things work but I do know that some of the stories that you have told are quite true but I know that most of them that are of top secret nature, and did not happen where they are reported and for that reason when a serious person goes looking in these false areas they give up even though they sometimes see the guards in the tan uniforms with the side arms and the government plates.

Sometimes they are guarding things like the desert tortuous and that is really what they are doing (for real).

Although I realize that my phone lines are infect most likely monitored I believe that if you will supply a good address for reply. TO my P.O.Box that you have, I will send you what I know, because there are people that I feel you have talked to that know how the stuff works, but were not there when some of it was flown and I just happened to see or hear things going bump in the night.

MY MAIN THING IS THAT I WOULD LIKE TO GET SOMEONE THAT HAS MORE GUTS THAN ME GOING IN DIRECTIONS THAT I KNOW OF, THAT ARE NOT ADVERTISED.

I do not want to burst any bubbles but I have seen so called UFOs that sure are, but that are not space craft and during some tests, they get observed, people make big stories. Quite a few of the tests have been observed and called by experts UFOs

For a fact a project that I was on was not classified we did in a desert in Arizona three years ago.

It went out of control and the last bit of telemetry I got back before the transmitter got disabled was a return that I feel was a low reading, and it said that the vehicle was accelerating at 31 G's when I lost the transmitters, primary and backup.
