

Gulf Breeze UFO Analysis

GULF BREEZE UFO

On Wednesday, November 11, 1987, Ed Walters, a Gulf Breeze, Florida building contractor, was alone at home working at his office desk. Through a large window just above his desk he noticed an odd glowing object in the sky approaching his house from the west. He could see the UFO over a house across the street. He then went to the front door of his house to get a better look at the UFO. He looked out the door and decided to take some photographs of the UFO. He went back into his house to get his camera and then went out on his front porch to photograph the UFO. He took four photographs of the UFO as it moved slowly across the sky. The UFO appeared to be about 200 feet away over a house across the street. He ran out of film and went back in his house to reload his camera.

When Mr. Walters stepped back out on his front porch to take more photographs the UFO appeared to be moving closer to his location and he went out onto the road in front of his house to get a better photograph of it as it passed overhead. As he raised his camera to take a photograph a blue beam from the UFO enveloped him and he was unable to move. He was aware of a humming noise in his head and he was seeing pictures of dogs in some type of book or catalog with something like a word written below each picture. As he struggled to free himself from the blue beam he started to rise above the road and heard a voice in his head telling him to stop struggling. His next conscious memory was of falling to the ground from a height of several feet. It appeared that who or whatever was in the UFO had attempted and failed to abduct him. This was the first in a long series of UFO and UFO entity encounters experienced by Mr. Walters.

The UFOs sighted by Ed Walters in this and many other incidents varied in color from gray-blue to orange-brown. They made no sound. They were about 28 feet in diameter and 15 feet high. They were circular in shape with a 4 to 5 foot wide disk-shaped midsection centered between two pie pan-shaped structures at the top and bottom. The bottom section also incorporated a flattened lens-shaped structure about 14 feet in diameter which was illuminated in the center. The midsection and the bottom section of the UFO were encircled by rows of large black squares and diamond-shaped panels or "windows" which were sometimes lighted. There were also horizontal lines going around the main body which were observed by Ed Walters but are not visible in the photographs. At the top of the UFO there was a short finger-shaped projection which was illuminated.
