In a message dated 9/8/00 7:15:56 PM, you wrote:

<<We just got a call from [REDACTED] today. He is in NJ and is on your list. He was contacted in June (I guess by Steve) and wants to know if he is still "in the pipeline". His # is [REDACTED]. It might be a productive call because at least this is someone who wants to be reached and is ready to be filmed.

Good luck.

Don't forget to contact me re airline tickets and/or rental cars with as much lead time as possible so that the fares won't be astronomical.>>

Em,

I filed a witness report on Pretko a couple of months ago. Sure, I'm up for it. Here it is again:

[REDACTED]

1. Obtain full name, address, phone numbers, email and other data and record same.

[REDACTED]
1 [REDACTED]
[REDACTED]

2. Obtain brief educational and employment history relevant to the testimony (ie, government, military, intel., corporate).

High school graduate. Enlisted in the Air Force in 1949. Witness held the rank of Staff Sergeant when he was discharged in 1955.

3. Record the details in summary form of the witness' testimony, providing salient information on date, location, position and involvement at the time of the UFO/ET event or project.

The witness had three UFO sightings while in the military. He described two of them for me.

While stationed at Hickum Field, Pearl Harbor HW during 1951, he and 350 other soldiers observed the following: Location-an outdoor theater with wooden chairs. Cloudless night, around 9:30 PM. The moon was over his left shoulder. 7 to 9 large brightly illuminated white disks appeared off to the right and maneuvered over their heads for 10 to 15 minutes. Suddenly, the disks then shot off into the night sky. In May of '52, 11:30 PM, he and 3 other guys were crossing the field to get refreshments. Two bright lights were noticed off in the distance. They silently jumped from one end of the horizon to over their heads, and to the opposite horizon in two seconds. "Those things were really going! At that time, the fastest known aircraft the military had was a flying wing at 550 MPH."

In 1952, the witness was "Bay Chief" of his unit. A GI from the Army came through and stayed with his unit for awhile. They got to know one another and started talking. This soldier disclosed that he was on Gen. Douglas MacArthur's security force, one of his personal bodyguards. At one point the subject of UFOs came up and the soldier asked the witness to step outside for a walk so that he could tell him something where nobody could listen to them. He said that he was going to tell the witness something, and if he ever told anybody else about it, he'd deny saying it. The MacArthur aid then disclosed that the General had personally viewed the saucer wreckage and bodies recovered near Roswell, New Mexico. The witness specifically remembers The MacArthur describing two "flying saucers" that crashed in New Mexico. He told the witness "They really do exist. Gen. Douglas MacArthur knows about it."

4. Ascertain the witness' degree of cooperation: Is he / she willing to be interviewed under full identity? Under a disguise (we want to discourage this except in rare cases) ?

Highly cooperative. Will go on camera.

5. Ask if he/she has corroborating witnesses to the event or project or corroborating documents and other materials.

The events took place 50 years ago. Corroborating witnesses are no longer known.

6. Always ask if the witness has other evidence, networks, or contacts to other witnesses which could be useful to the project (they may not offer this and so this should always be asked).

Not known.

7. Write your own assessment of the value of the witness' testimony and credibility, and HOW the witness comes across (articulate, etc) .

Highly credible, detail-rich testimony. Testimony is consistent. Witness is articulate, credible sounding and clear headed.

8. Let the witness know that we will be contacting him/her later to set up a date to conduct a full interview.

Done.
