Not sure this guy would conform to those on the witness list since the witness died.
I'll let you figure it out.

its unfortunate that i didnt hear about you until recently, my father who was deeply involved in ufo cover up died in 2018, supposedly due to stage 4 cancer during routine knee surgery after not having cancer his entire life....its appeared in a 1 week period from 0 to stage 4 terminal, after he made open statements he was planning to write a book about what he knew.....four points he did mention i remember clearly was there was something 12 floors beneath pentonio plaze i think he said it was, at last thats how it sounded....there was something under the pentagon.....when he retired in 95 the usa had 2 small ships and 1 large ship in their possession...and lastly he mentioned that USSS Vessels existed before he retired, and that they specifically were united states space ships.....he was involved in the story that inspired the movie "fire in the sky" and was the military spook who interviewed the person abducted, and according to him when the person was found they were covered in biological matter not all of it their own.....his name was james dennis schlicher, or as al gore liked to call him "Slick", and was one of the main planners of desert storm and main people in charge of M1 tank.....i think he would have been very proud that someone is trying to blow the whistle after his death, its just a shame he never got the chance to speak to you.....My name is [REDACTED] and i wish you the best of luck in pursuing the truth, i have been aware of alot of what you spoke about on the kim iverson channel for over 2 decades, but because of the strange circumstances related to my dads death and his high clearance while alive it wasnt the safest thing to reach out to anyone until now.....
