
My experience on Eglin Air Force Base

The government monitors UFOs from Eglin Air Force Base in Fort Walton, Florida. There is a SCIF located on Eglin called Site C6. There is a mission statement written on the wall when you get inside the facility in gold letters that reads, "We monitor all space activity terrestrial and extraterrestrial from planet earth". The radar can track objects the size of a grapefruit 20,000 miles in space. So, the government knows where they come from and where they go once they get here. I was a military policeman in 2009 when I was fortunate enough to visit the facility, which is, located about 15 miles deep inside the base. It has since been turned over by the U.S. Space Force. My entire unit was told when we got there if we were patrolling with the marine patrol that occasionally we would have to retrieve "space junk" out of the water. We all kind of laughed about it when we were told and I forgot about it until my Air Force security forces counterpart asked me if I wanted to go to the site to take some food to the people working there and I was shocked when I walked inside the facility and read the sentence on the wall. I can recall on two occasions when our leaders inexplicably made us go inside at night because something was flying around they didn't want us to see. I also observed unmarked white jet planes leaving the base. Our unit had two missions there because we were getting ready to deploy again overseas. First, was marijuana eradication because Eglin is a huge base. Second, was doing garrison security working tandem with the Air Force security forces and contract security officers. It was one of the most interesting places I've ever served on in my 10 year military career. I served 4 years in the Marine Corps and 6 in the active Army and National Guard. You can actually Google Site C6. I was surprised it's in the public domain. It's one of those places the government tries to hide in plain sight. I had a UFO sighting when I was very young with my mother and sister. We all three observed a UFO on the ground in a field next to where we lived in

Georgia in the late 1970's. I had forgotten about it until I visited Eglin and realized that we are not alone and that the government actually monitors them. It was shocking to me when I learned it was real. I had never spoken with my mother about our incident until a few months ago because I couldn't stop thinking about what I learned at Eglin. I came out as a whistle blower and have told some important people investigating this matter my story. I hope others come forward. What really piqued my interest was why does "space junk" just fall in and around Eglin Air Force Base and not fall in our backyards sometimes? I've heard rumors of the Air Force using EMP weapons in order to bait and bring UFOs/UAPs down but I can't verify that only what I observed directly. I've heard Chris Mellon mention Site C6's capabilities but he never calls it by name. I knew what place he was referring to as soon as I heard him mention some of the United States radar capabilities in an interview.
