H [REDACTED]

This man has some well-documented personal UFO sightings—but probably of even more interest is a secret book on UFOs he came across in an AF library. I've bolded that part below.

 Subject: My Experience W/UFO's

As I had promised, I am writing to inform you of my UFO experiences.

First, my personal background. I was born in Niseland So. Dakota in 1938. Have lived most of my life in the Denver, Colorado area. I spent a short term in the Army and Army Reserve. I then went to and graduated from Colorado State University (CSU) in 1964. At CSU I went through the Air Force ROTC program and was commissioned a 2nd Lieutenant. From 1965 to 1970, I was in active duty with the Air Force and left as a Captain (Air Force really sucked). I began and operated a small air charter service from 1972 to 1973. In Aug. 1974, I was recruited by the Colorado Bureau of Investigation (CBI) as an Agent Pilot. I was trained as a crime scene investigator, arson investigator, and the last 9 years I investigated drugs/narcotics. I retired on a medical retirement in March of 1992 after being seriously injured in an airplane accident in which I was the pilot during an undercover drug operation.

In approximately 1952, my mother, a Native American Hispanic women with little interest in technology or UFO's, was gossiping with 2 neighbor women when a flash of light from a reflection of the sun caught her eye. My mother looked up from where the flash came from and she observed 3 round disks flying from the Southeast toward the Northwest, toward Boulder Colorado. My mother told me that they were exactly round and luminous and about higher than the mountain peaks in the west. She said she became very excited and told her neighbors to look up at the disks. Her next door neighbor looked up and she also became excited at what she saw. However, the other neighbor, standing next to her, who lived about a block away, immediately countered my mother and her next door neighbor and scoffed with a stupid statement, saying, "you don't see anything, stop with your excitement." My mother told me that the disks flew in a direction toward Boulder and she became more excited and surprised when she saw the disks join approximately 6 other disks and they flew westward together and in a climb until they disappeared.

In my first year in the Air Force, 1965, I was assigned to Space Unit Library. In reorganizing the different books and documents, I came across a book classified "Secret." The book was an Air Force document containing military visual sightings and radar contacts with unidentified objects. I was surprised that the Air Force would have such a bound book available for personnel with need to know and clearances at the library.

From August 1974 to spring of 1980, I piloted the CBI Cessna Turbo 206 Stationnaire. On a return night flight from Kansas, with another CBI Agent as passenger (he too was a pilot), [REDACTED], I was under control by the Denver Approach Control Radar. Approximately 50 miles east of then Arapahoe County Airport, Denver Approach called me and told me that I had traffic at my 12 o'clock position, 10 miles and closing. I replied that I did not have the traffic in sight. The controller then said that the traffic was now 5 miles and closing, still at my 12 o'clock position. The controller immediately gave me a vector to turn to the right to clear the unknown traffic. I then stated I did not have the traffic in sight. the controller then informed me that the traffic had turned in my direction and in a collision course and cleared me to make a wide turn to the left to avoid a potential collision. I turned the Cessna 206 left and replied that I still did not have any traffic in sight. The controller then told me that the traffic again turned in my direction and was very close, could I see the traffic? I replied, negative and the controller immediately stated that the traffic was right on me either below or above me, could I see it? I again

Wednesday, April 07, 2004 [REDACTED]

informed the controller, that I could not see the traffic and I then bank the airplane to get a clearer view below me. I did not see any flying traffic, so I banked the airplane to look above. Still I saw nothing. shortly thereafter, the controller told me that the traffic which was flying with me separated and was heading south. I was flying west toward Arapahoe County Airport. I then told the controller that at no time did I see the traffic. Curiously, the controller then asked, "Do you wish to make a UFO report?" I replied, no I did not want to make a UFO report. I was curious because the controller was the one who was observing this maneuvering object, why was I supposed to make the report?

In the spring of about 1979, I received an order from the Director (boss) of the CBI to assist the Colorado State Organized Crime Strike Force (OCSF), in an aerial search of stolen rail road cars that may be located in farming fields with rails near Windsor Colorado. Three OCSF officers (law enforcement officers), came to the hanger at Arapahoe County Airport where the CBI airplane was hangered. One of the OCSF officers was [REDACTED], a friend I knew well, assigned to the OCSF from the State Attorney General's Office. [REDACTED] was a criminal investigator. The OCSF officers boarded my Cessna 206 and I flew them to the farming fields near Windsor Colorado, about 60 miles north of Arapahoe County Airport. While the officers were looking in a search below and I had the airplane in a northeast direction, I was looking for any aircraft traffic in the vicinity to steer clear of them. I briefly looked at about a 45 degree direction to my right and was surprised to see that a cloud bank about 25 miles directly east of me became luminous, like if a car was driving through fog and the head lights made the fog luminous. The clouds had this same luminous appearance. I excitedly said out loud to [REDACTED] who was seated at my right, "Look [REDACTED], the clouds are lit up!" As [REDACTED] turned his head to look, I observed 4 oval long disks burst out of the cloud from the luminous area and immediately behind the disks, flew out a huge luminous globe appearing to be engulfed in a blue like flame. The whole globe looked of a medium luminous blue. The globe or large ball flew from south to north so fast that in less about 2 seconds, it was gone from sight, north as it was punching through small clouds leaving small swirls of cloud puffs behind. I asked [REDACTED] what do you think that was? [REDACTED] replied, "I only saw the puffs of the clouds" as it went north. He said he knew, though that something made those sudden puffs swirl. I then told [REDACTED] to mark down the time, 2:38 pm. We then flew back to Arapahoe County Airport where the OCSF officers boarded their cars and left. I then called the fueling group to fuel the airplane. Thereafter I pushed the airplane into the hanger. This took all of 45 minutes. I then left the airport and radioed my departure to my home to the CBI dispatch. CBI dispatch then asked me to give them a call on the telephone from somewhere nearby. I replied that I wasn't too far from the CBI, that I would just stop there. When I arrived, the dispatcher, a lady, informed me that an FAA official had called there, asking for me and left a telephone number for me to return the call. I called the FAA official, I presume was an inspector. The FAA person informed me that [REDACTED] after hearing a report of a sighting on the car radio and for anyone seeing the unknown flying object at about 2:38 pm, to call the FAA at a given number, did in fact call ([REDACTED] called) the FAA with an agency cell phone. [REDACTED] heard the radio report on a music station, while he was driving home from Arapahoe County Airport. The FAA official asked me for details of my sighting of which I gave. He then told me that at 2:38 pm, a group of persons, who were located south of Arapahoe County Airport, saw a globe flying extremely fast from south to north. The witnesses then called the FAA who were then connected to the FAA person I was talking to. These witnesses gave their report to this FAA person. I told the FAA person that it didn't surprise me that the other ground witnesses saw the globe about the same time as I did because the globe was flying so fast that in a matter of a very few seconds, it was in my area. The FAA person said that he was especially concerned about this sighting because he contacted NASA to see if any satellites were circling from south to north or if any space debris was entering the atmosphere from south to north. The FAA person said that NASA had informed him that none of the militaries, U.S., Russian or otherwise, had any satellites circling south to north, nor was any debris entering the atmosphere from south to north, both at that particular time. The FAA then asked me to give them a written report of my sighting. Of course, knowing the narrow minded attitudes of my supervisors, I declined to make the report.

There are 4 more sightings I experienced, 3 while flying with other police officers as passengers, and one on the ground. I will send them to you in the very near future. Incidentally, my CBI Agent friend, [REDACTED] who was with me during the night return flight from Kansas has since passed away. His wife, however still lives in Longmont, Colorado. If you have any questions, please feel free to contact me.
