From: [REDACTED]
To: [REDACTED] (Steven Researcher)

[REDACTED] Steven,

What is this woman talking about? Do you understand the RV terms she uses?
My niece referred her, and she worked at SRI with [REDACTED] So maybe I
should not dismiss this. Maybe this is from an advanced viewer? Is she
implying the balls of light are paraprobes? Maybe we ought to talk to her.
What is OSID?

Let me know what you think. RR

deep
witness?

Hello,

[REDACTED] told me to contact you after you forwarded her the mass mailer on
the orb that was located in Hammon, ILL in 1978 by a farmer who contacted my
long time friend and associate, [REDACTED]

I had no idea how much was going on with the paraprobes but in the past week
or so I've received messages that are really scary. It seems that there is a
heightened rush of those who believe in space brother being benevolent,
which they probably are, but the enrapturement is what is concerning me as I
know a lot more about the orbs than I suggested in my request for
information.

These are paraprobes and they are being sent in not only as a form of
evaluation but as a neural trigger for something that was planned for our
world for a long time. The total culmination isn't bad, it's the in-between
period that I'm now witnessing that is called the FLUX. There are a lot of
preparatory projects built around the FLUX which include ENRAPTUREMENT which
is highly abusive as those who are triggered through the Retinal Capacitor
behind their left eye begin to change, considerably.

In talking to [REDACTED] I discovered your interest in Remote Viewing. I have a
good deal of information on a lot of things that you may have an interest
in, such as Reticulated Discovery, Reticulated Paths and Reticulated
Dominance. These are all completed projects and I had a lot to do with them,
building a team of over 3500 women who were located as a result of their
belief in their abductions in a four quadrant area of the country. These
women are called VESPA and their counterparts are called VECTORS. The Vector
is the handler for the Vespa and through their joint endeavors, this
government has surpassed every other government in any attempt to ensure
Sympathetic Paths.

If you have an interest, please contact me. I wrote to Whitley today as I
was told that he had an interest in the paraprobes.

I worked very effectively with OSID for over 26 years, actively and another
8 as an out-unit. Be very interested in making contact with you. Thanks,
