December 27th, 1994

Dear Stephen:

Further to our telephone conversation this morning, there are three areas we would like to focus our attention on during our meeting in San Francisco.

- To realistically assess how we might enable astronauts and other knowledgeable personnel to come forward. And, how best to disseminate this information, given the complexity of the situation.
- How we can assist CSETI, given our respective media backgrounds, in advancing CSETI's agenda of educating the public at large, nationally and internationally.
- To discuss my current TV project, and how you may care to participate.

Saturday night, January 7, has been set aside for a dinner and discussion on these topics. I suggest we get together around 6:00 PM at my home and going for as long as we need to that evening. We have invited the Deans, but are unsure, at this juncture, as to whether they can attend. I will call Joe Burkes today and see what his availability is like. In addition, Ralph would like to tape a radio interview with you while you're on your whistle stop tour.

■ [REDACTED]

I know you are vegetarian. So are we, for the most part, but cook a little fish or chicken from time to time. Please let me know your preferences. Also, we're available to assist you in any way you may need to make your stay more comfortable and productive.

We are all very excited to hear your up-to-date news and explore these exciting opportunities.

Wishing both you and Emily a joyous, healthy and prosperous New Year!

Sincerely,
