Dr. Greer,

I want to thank-you for the talk that you gave on Saturday in DC. It was very informative. Do you ever give longer lectures? I am really curious to learn more about your research. I am the person that met you who works for SAIC.

I too had seen a silver disk shaped object in Tysons Corner in 1990 and cannot explain it today. You are right, it was not flying, it was just there. I sat at an intersection facing highway 7 for 5 minutes and watched it. The people in the cars next to me didn't seem to notice it. Lately, I have been watching a blinking star in the northwest that blinks red, green and white lights. One day it may have taken the shape of a saucer. It is hard to really get a clear picture with binoculars. My ex was in the air force for 15 years and I began researching UFOs in Montgomery, Alabama when a neighbor claimed a UFO floated over their swimming pool. Her entire family saw it. I thought she was nuts but agreed to help her do research. The more I read, the more it made sense. I asked a retired air force NCO once about them, and he told me he was stationed in England when the supposed UFO and aliens met people on his base. He didn't see them, but said that a friend did.

It is good to see that you are documented these cases. I showed your book to a retired Army NCO today and he was quite fascinated. When I told him about our secret group at SAIC, he was quite surprised. Drunvalo Melchizedek told me about them and I read about them when doing research on remote viewing. Drunvalo met with one and signed a contract to market a special water that cleans pollution. I was at the earth sky workshop when he met the person. The water project didn't pan out at that time. Have you heard of Drunvalo?

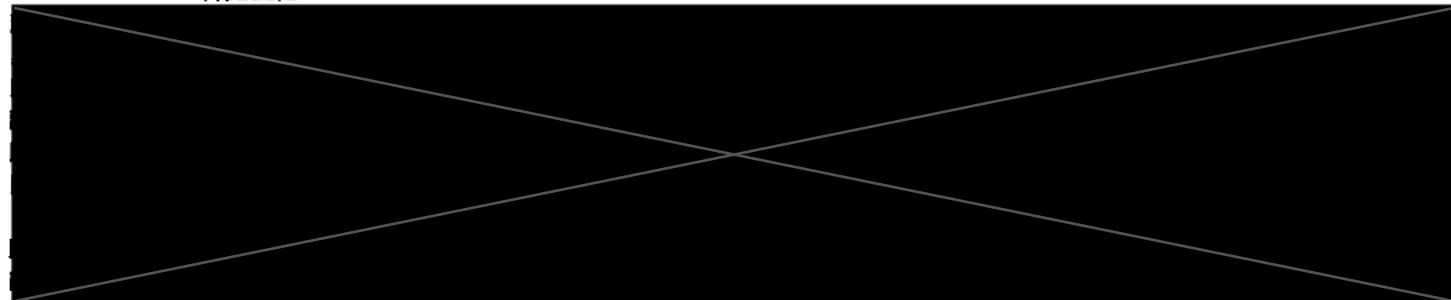

I am very fascinated by your rolodex. I have been trying to get contacts in the media to publish some areas of fraud and have trouble getting the phone numbers and addresses. Hopefully, by next year, after the legal case is completed, I can go public. Is there anyway you could share your media list?

Please add me to your email list and keep me informed on activities and areas that I might contribute to.

Thank-you again and it was really good meeting you.
