Not sure whether you want print or video material.

There is an interview with [REDACTED] and [REDACTED] that can be played from the Front Page of the CSETI Website.

In this, [REDACTED] also describes touching the pyramid shaped craft that landed.

This was excerpted from a Collectors Edition 2-part video from the Discovery Channel entitled "UFOs - down to Earth", produced by [REDACTED] and [REDACTED] in 1997.

You have a copy of this interview on the tape I brought to VA last year.

There is also much material on Q [REDACTED] in "Left at East Gate" by [REDACTED] W [REDACTED]

I have another (not so good) interview with [REDACTED] still to be catalogued - this includes the live tape recording of his excursion into the woods that was widely released.

As you probably know, N [REDACTED] has a source who claims that ETs were captured during this landing. Initial preparations were made at (I believe) Strangeways Prison to receive them, and all the prison logs for the period in question in 1980 are torn out or missing.

My suggestion is that at such time as the project goes into post-production, I run off a dub on SuperVHS double-sided Fuji tape for inclusion. This higher quality material will not play on regular VHS recorders, but I know, for example that LaserPacific can handle this.

FYI if you look at the CSETI VideoGallery at <http://www.cseti.org/position/addition/videogallery.htm> with around 80 clips, you may see other material suitable for inclusion.

There are still many other clips I am working on as time permits.

Best
