That's fine, in a few weeks you contact me again, if he really wants to call me, I can easily give you the number just like this email, I want to talk to the Dr. but until the time comes I see no need in ya'll holding onto my number, the infosec isn't right, stay in touch

[REDACTED]y,
Dr. Greer might want to call you in the next couple of weeks.
Would you provide your phone number that I can give to him?
I will not share it with anyone else.
Sincerely
[REDACTED]

I would assume it would require more than consent, more along the lines of a nondisclosure agreement SOMETHING "legally binding", there's much I have not told you because of how sensitive the info is besides the UFO obviously, when do you "think" project when I'll be able to communicate with Dr. Greer, I know he's busy with actual paying business and I'm just a whistleblower..

Also, I'm not looking nor wanting any money from this, just to do what's right and to be protected

[REDACTED]

We absolutely will not share your name with anyone other than Dr. Greer.

We take everyone's confidentiality very seriously and only share a name if we ask permission first.

Sincerely

[REDACTED]

< [REDACTED]

That's good but sad, I hope I'm able to tell him my whole story soon, what other parts i have to share at beyond top secret, because honestly it sounds unbelievable, even movie made up.

And please for the love of God, don't share my first n last name just because my email has it on there.....

I'm not trying to be on the gov. loose ends club, I don't have laces anyway.....

[REDACTED]

Thank you very much , [REDACTED].

I will share this with Dr. Greer and will be back in touch regarding follow up, but I dont have a time frame.

Sincerely

[REDACTED]

[REDACTED]

Greetings Ms. [REDACTED]

Firstly, there's too much to write that needs excessive detail,

Secondly, I don't want to write EXACTLY all the specifics of my intel they are probably quite damning and could endanger all of America and Nato, WAR might break out from the information I hold; I'm afraid of the consequences because this is, but I need answers.....

It happened:

From Nov 2008- March 2009

Both incidents occurred in southeast Asia on a US military base of the determined time period listed above. (I will give all exacts on video call)

My position in the military was low level, enlisted, but highly trained and educated, even before the military.

This IS UFO related NOT UAP, this was not a phenomenon, not a blip but a long gander at the subject, it had been parked and loitering in air for some time before it disappeared, with 2 additional witnesses with me (cannot give their names, I lost contact with them shortly, I remember their jobs but they were so spooked they wanted nothing to do with me).

UFO that I saw was definitely advanced, smooth, even and uniform; you couldn't tell what was the front or rear left or right but with its paint scheme it might have been ours or the enemies because the livery was quite low tech but it could have just been some kinda phenomenon because of the time of day.

I can describe in MUCH further detail but there were other incidents after that made me put all the pieces together.

The other incident is so crazy I dare not text it for it's more damning than the UFO 🛩 sighting.

[REDACTED]

Hello [REDACTED].

I understand your reluctance to discuss things in detail,

but before talking with Dr. Greer I would need to be able to share something with him.

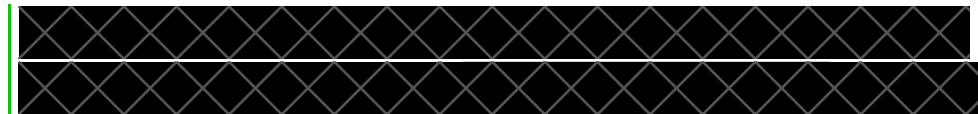

When did what you want to talk about happen? Where?

What was your position in the military at the time?

Was this UFO/UAP related ? Please describe as much as you feel you can.

Please reply to me at [REDACTED]
so your answer will not get lost in the webmail.

Thank you so much

Email:

Body:

Hello,

I wanted to get in direct contact with Dr. Greer, I feel this isn't safe to communicate on; I'm a patriot and a fully disabled veteran, I discovered sensitive events 15yrs ago and I don't think what I know would betray my country but for the longest time I've known.

Maybe if the good doctor could contact me directly, I guess first through email then through some kinda face time (fb etc.). I fear my life is in jeopardy if I unveil what I know to the wrong hands!!!!

Sincerely, R.
