Subject: Re: NPC 12JUN23

Good morning Dr. Greer,

That is a great question. Since the equipment at the South Pole Station is manifold in its functions, for the purposes of this conversation I would need to limit the answer for this event. I will try to not be long winded in this email as well. At first thought, I think it would be simple enough to share some info to prove my presence on the Ice followed by info about the IceCube Neutrino Detector. More specifically in regards to it's ability to communicate with that fleet of ships Gary McKinnon found and to emphasize the "Faster Than Light " capacity of the transmission. Proof of FTL comms is a very big deal. Recently the folks over at Nobel Prizes awarded some folks for the science that supports the entangled tech I am discussing. But I am probably preaching to the choir here.

Additionally I think it would be prudent to discuss the ability for the system to be used to monitor "Air Traffic" on and off planet. I gather that would be sufficient discussion for the UFO/UAP side of this. As far as the ZeroPoint/Free Energy topic is concerned it would be the weapons capacity that would indicate that. Energy input and output numbers come into question rapidly. Delivery over great distances as well and as Tesla put it "without any propagated loss". Although we may not like or support that there are weapons for fighting UFO's we have to understand there are elements that are big into that.

Besides there is the rich history from back with Admiral Byrd and the Nazis, folks like Lloyd Berkner did not just disappear. Antarctic science has always been USAP by definition. You and I spoke very briefly before and we certainly did not hit every nail on the head about my time in Antarctica. I could go on and on about the connections but will certainly reign it in as needed.

Also since we spoke last I was tapped to film a TV episode here in Alaska. "Alaska Triangle" season 2 episode 9. They reached out to me to see if I could assist them in finding a USO or secret underwater base off the coast of Ketchikan Alaska. Long story

short I did find what they asked me to and we filmed the whole thing. The odd part is that they edited out all the parts of me finding stuff and just presented the search as a failure. I think folks should be aware of stuff like that also.

Unfortunately I am learning that there are many BS artists out there in the disclosure movement so I am very happy you are putting something like this together again. I look forward to being able to do my part!

Here are some supporting documents as well:

[DOM Document – Deciphering My Experience](#) This document proves the ability for transmission to be sent from the Pole.

[Torsion Field and Interstellar Communication – Deciphering My Experience](#) Section 5 clarifies the torsion field comms capacity at South Pole Station. I believe there is no larger torsion field generator on Earth. That alone is a conversation!

I also have tons of pics and videos available to support my direct first hand experiences. Heck I even know folks that were radio operators that heard "alien sounds" on the airwaves with regularity. Odd things on the Ice are not in short supply. I am not sure how to serve this one up any easier for you.

Be well

Thank you for your offer! How would you connect what you saw to the Ufo/ UAP specifically- or to the suppression or existence or zero Point free energy? Thanks 🙏

> Hello Dr. Greer I hope all is well with you. I heard a recent interview where you are putting out a call for more whistleblowers in your movement for your the next NPC event. I would like to offer my resources and my testimony to this event. I am not afraid to share my first hand experiences from South Pole Station. More has happened since last we spoke as well that I would be happy to share. I would like the chance to speak on behalf of those from the Ice that have been negatively impacted. I am on point for them. You have defined where the frontline is on this fight. I believe I have enough skin in this fight to respectfully request time at the podium. I will knock it out of the park for you!
