to Congress*

[REDACTED] just called me. He was telling a medical Dr. friend of his about the Disclosure, and the Dr. told him about a man he knows who witnessed a UFO coming out of the water (less than 50 yards away) while on a military ship returning from Viet Nam in the late '60s/early '70s. It was a 5-10 min. sighting, and other guys saw it too. Don asked if the man would be willing to do a videotaped interview--the Dr. checked, and the man (whose name is [REDACTED]) agreed to do it. He lives in the LA area. Could we get [REDACTED] or one of his guys out there to tape an interview?

Also, [REDACTED] knows a freshman congressman in DC who is on the Judiciary Committee, and will soon be on the Intellectual Property Committee (deals w/new technology transfer)--his name is [REDACTED]. His father was a businessman who developed "new technologies." [REDACTED] didn't know if he might be related to Congressman Schiff of NM. Anyway, [REDACTED] says he has a good relationship w/[REDACTED] can call him anytime--but doesn't want to jeopardize that relationship, so would like suggestions on how to approach Adam Schiff "discretely, if you know what I mean..." (You know how [REDACTED] talks in CIA code half the time, and I don't really "get it"). I mentioned the video will be available at some point to convince these guys of the topic's legitimacy, and Don thought that would be good. Do you have any other suggestions?

Also, [REDACTED] made an off-hand comment--right after mentioning Area 51--that there is an island off Puerto Rico where "strange things happen"--then he mentioned Wackenhut having something to do with it, and said that was something to discuss later. This guy is a wealth of information. He also mentioned a friend of his named [REDACTED] who was involved with some Drs. at Utah State U. who were doing research into some electronics that could cure cancer--in late 1998--but couldn't get support to get anywhere with it.

[REDACTED]
