>Attached is some information from a book by Maurice Chatelain called 'Our
>Cosmic Ancestors' that was excerpted by a journalist and friend of mine,
>[REDACTED]. The book is really about ancient technology but as part of
>the background story discusses NASA astronaut experiences with UFOs,
>including the Apollo moon missions. I have also read this book. And I was
>also very intrigued by the passages [REDACTED] copied, for two
>reasons. 1-Maurice was very highly placed in NASA, in charge of overall
>mission communications for the Apollo program. So I see him as a very
>credible source. 2-The book was not about UFOs. It was about new ways of
>looking at evidence of ancient technology from the perspective of modern
>space flight technology. So the UFO material was incidental to the
>message, not the main course.

>
>Note the comments on Apollo 13, The Apollo 13 story is pretty amazing. I
>wonder if the faulty coil story from NASA was a coverup or if that's what
>blew in response from an energy ray of some sort from a UFO.

>>
>> Here is some information copied directly from a book I recently received
>> written by Maurice Chatelain ('Our Cosmic Ancestors'). You may have read
>> part of all of this before, but I always like to trace UFO-related
>> information back to an original source before endorsing it. And here it is!

>> [REDACTED]

>>
>> _____
>>
>> In this book, Chatelain writes that "several strange things happened"
>> during the American space program, some of which cannot yet be talked
>> about. (p. 21)

>>
>> After describing in brief detail some of the technical problems NASA
>> astronauts encountered during their flights, he continues as follows:

>>

[REDACTED]

[REDACTED]

> > "But the astronauts were not limited to equipment troubles. They saw things
> > during their missions that could not be discussed with anyone outside of
> > NASA. It is very difficult to obtain any specific information from NASA,
> > which still exercises a very strict control over these events.

> >
> > "It seems that all Apollo and Gemini flights were followed, both at a
> > distance and sometimes also quite closely, by space vehicles of
> > extraterrestrial origin – flying saucers, or UFO's (unidentified flying
> > objects), if you want to call them by that name. Every time it occurred,
> > the astronauts informed Mission Control, who then ordered absolute silence.

> >
> > "I think that Walter Schirra aboard Mercury 8 was the first of the
> > astronauts to use the code name 'Santa Claus' to indicate the presence of
> > flying saucers next to space capsules. However, his announcements were
> > barely noticed by the general public. It was a little different when James
> > Lovell on board the Apollo 8 command module came out from behind the moon
> > and said for everybody to hear: 'We have been informed that Santa Claus
> > does exist!' Even though this happened on Christmas Day 1968, many people
> > sensed a hidden meaning in those words that were not difficult to decipher.

> >
> > "James McDivitt was apparently the first to photograph an unidentified
> > flying object, on 4 June, 1965, when he was over Hawaii aboard Gemini 4.
> > Frank Borman and James Lovell took magnificent photographs of two UFOs
> > following Gemini 7 on 4 December, 1965, at a distance of a few hundred
> > yards. The UFOs looked like gigantic mushrooms with their propulsion
> > systems clearly showing a glow on the underside.

> >
> > "The following year, on 12 November, 1966, James Lovell and Edwin Aldrin in
> > Gemini 12 also saw two UFOs at slightly over half a mile from the
> capsule.>

> > These were observed for quite some time and photographed repeatedly. The
> > same happened to Frank Borman and James Lovell in Apollo 8 on Christmas Eve
> > 1968, and to Thomas Stafford and John Young aboard the Apollo 10 on 22 May,
> > 1969. The UFOs showed up both during the orbit around the Moon and on the
> > homeward flight of Apollo 10.

> >
> > "Finally, when Apollo 11 made the first Moon landing on the Sea of
> > Tranquility and, only moments before Armstrong stepped down the ladder to
> > set foot on the Moon, two UFOs hovered overhead. Edwin Aldrin took several
> > pictures of them. Some of these photographs have been published in the June
> > 1975 issue of Modern People magazine. The magazine did not tell where it
> > got them, vaguely hinting at some Japanese source.

> >
> > "There was even some talk that the Apollo 13 mission carried a nuclear
> > device aboard that could be set off to make measurements of the
> > infrastructure of the Moon and whose detonations would show on the charts
> > of several recording seismographs placed in different locations. The
> > unexpected explosion of an oxygen tank in the service module of Apollo 13
> > on its flight to the Moon, according to rumors, was caused deliberately by
> > a UFO that was following the capsule to prevent the detonation of the
> > atomic charge that could possibly have destroyed or endangered some Moon
> > base established by extraterrestrials. Well, there was a lot of talk and
> > there still is.

> >
> > "It was also said that during their flights, our astronauts frequently felt
> > as if some external forces were trying to take over their minds. They
> > experienced strange sensations and visions. What seems almost certain is

that some of the astronauts did have psychological problems and changes of personality after their missions in space. Some turned deeply religious, some seemed to develop mental trouble – facts that, of course, could be ascribed to pure coincidence, without particular significance." (pp. 24-25)

Chatelain says he did not believe in UFOs during the space program and learned that they were real only later from fellow scientists in France. (He was a French citizen from Morocco who relocated to California in the late 1950s.) He says talking about such things in NASA would have meant the end on one's career. His information about astronaut sightings comes from sources he cannot reveal. But since he designed the communications and data telemetry systems for Apollo, he was probably well connected.
