

DEPARTMENT OF THE AIR FORCE
WASHINGTON

OFFICE OF THE SECRETARY

27 OCT 1958

**PROPERTY OF
U.F.O. STUDY GROUP
OF GREATER ST. LOUIS**

Dear [REDACTED]:

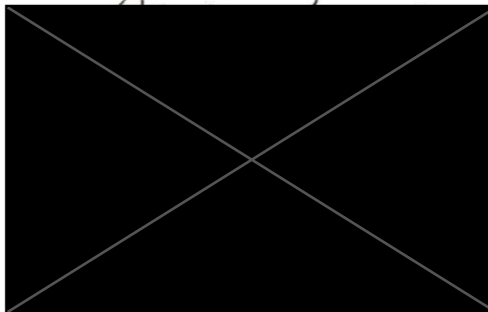

I refer to your inquiry concerning unidentified flying objects.

There has never been an Air Force conclusion that flying saucers were real and were interplanetary space ships. The alleged 1948 document mentioned in your letter is non-existent.

The Air Technical Intelligence Center's budget embraces many technical fields. Therefore, it is not possible under the present accounting procedures to determine specific amounts expended on the investigation of unidentified flying objects.

I am inclosing the latest Department of Defense fact sheet on this subject. It clearly outlines the Air Force's position regarding unidentified flying objects.

Sincerely yours,

DEPARTMENT OF THE AIR FORCE
WASHINGTON

OFFICE OF THE SECRETARY

14 October 1964

Dear [REDACTED]:

The Air Force wishes to acknowledge your recent letter to Project Blue Book at Wright-Patterson AFB, Ohio.

The Air Force is not aware of what your organization's policies and purposes are; however, the Air Force's objective in investigating UFOs is to determine if they pose a threat to the security of the United States, to determine if the phenomena has any scientific value for research and development purposes, and to specifically identify the object or phenomena.

The reported holes in Glasboro, New Jersey were determined to be crudely dug holes and the case is officially carried in Air Force files as a "Hoax".

The three reports mentioned in your letter as being under investigation by your affiliate have never been reported to the Air Force. The Air Force only investigates or evaluates those sightings which are officially reported to them by the witnesses or observers.

NICAP's report, "The UFO Evidence" contains no evidence to support the contentions that unidentified flying objects are extraterrestrial. NICAP's allegation of Air Force secrecy on UFOs is not true. Project Blue Book is an unclassified project.

The alleged 1948 ATIC document that "concluded that UFOs were interplanetary vehicles" is nonexistent. There is no record of such a document in Project Blue Book files.

All of the recent New Mexico sightings have been evaluated as (?) or conventional objects or hoax's with the exception of the sighting by Lonnie Zamora at Socorro, which is still considered as unidentified by the Air Force.

The Kinross incident was at no time considered a UFO sighting or report. An aircraft, F-89, was scrambled to identify an unidentified aircraft. The F-89 identified the radar plot as a Canadian Dakota and

was returning to base after identification when the aircraft crashed into Lake Superior. This case is officially carried in Air Force accident files at Norton AFB, California and has no association whatsoever with Project Blue Book.

The Washington, D.C. sightings of 1952 are well known, well documented and attributed to an inversion in the area.

Percentages of solved and unsolved reports are available yearly in the Fact Sheet published by the Air Force. It should be pointed out that while a case is not solved that this does not mean that the unidentifieds can be attributed to interplanetary vehicles under intelligent control. All unidentifieds received to date, fail to indicate any association with vehicles of this nature.

Sincerely,

Major, USAF
Chief, Pictorial Branch
Public Information Division
Office of Information

DEPARTMENT OF THE AIR FORCE
WASHINGTON 20330

OFFICE OF THE SECRETARY

MAR 29 1967

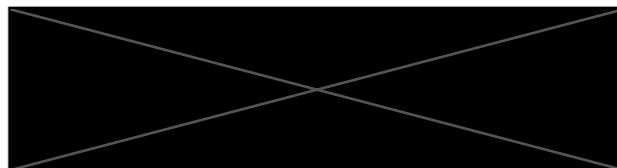

Dear [REDACTED]:

This replies to your letter requesting information on certain documents pertaining to unidentified flying objects (UFOs). At present, I do not have any information to send you on the September 23, 1947 letter about which you inquired.

Regarding the 1948 "Estimate of the Situation," the late Captain Ruppelt in his book, The Report on Unidentified Flying Objects, provides the answer. The Top Secret Estimation was working its way up to the higher echelons of the Air Force. It got to the late General Hoyt S. Vandenberg, then Chief of Staff, before it was "batted down." The General wouldn't "buy" interplanetary vehicles. The report lacked proof and the Estimate died a quick death. Some months later, it was completely declassified and relegated to the incinerator. I am sorry, but we have no copies of this document.

I have attached two more copies of the 1953 Panel's conclusions; I am sorry that our copies are of such poor quality. Regarding a photostat of the original signatures, I can only repeat what I stated in my February 23 letter, since this was not an Air Force report, we do not have a photostat of the Panel's original conclusions bearing their signatures.

Sincerely,

Lt Colonel, USAF
Chief, Civil Branch
Community Relations Division
