*Shows CIA covert involvement in allegedly independent Panel - 5*

Dr. Julius A. Stratton, Provost  
Massachusetts Institute of Technology  
Cambridge 37, Massachusetts

Dear Dr. Stratton:

Reentering your request to be kept informed of any progress in the problem of "unidentified flying objects," this letter will bring you up to date.

Last December, the section of the Air Technical Intelligence Center charged with investigation of reports of sightings presented a status briefing at the Agency. Based upon the evidence presented, the subject was discussed at a December meeting of the Intelligence Advisory Committee (CIA, Army, Navy, Air Force, Joint Staff, State, AEC, and FBI). At that time it was recommended that CIA should assemble a panel of highly qualified personnel to examine the problem and its ramifications. Particular competency in the fields of physics, radar and astronomy was believed desirable.

We were fortunate to obtain the services of especially qualified men, I believe you will agree. Enclosed for your information are copies of the report submitted by the Panel and related material. We concur in the conclusions and recommendations of the Panel, and are forwarding the report to appropriate authorities. Since the problems related to this subject appear to be operational rather than intelligence in nature, we will be concerned only indirectly in the future. However, if there are any developments in which we believe you might be interested, we shall inform you. Incidentally, knowledge of any interest of CIA in the subject of "flying saucers" has been carefully restricted, in view of probable misunderstanding if it were publicly known.

With best wishes,

Confidentially yours,

Signed: H. Marshall Chadwell

H. Marshall Chadwell  
Assistant Director
