Overflight of ICAF Installations by Unidentified Aircraft
(Col Chapman's Ltr, 31 Mar 77)

AF/IG

1. AFOSI files revealed no record of the overflight of Loring AFB, ME (LAFB) in Jan 75 as reported in referenced letter. However, our files reflect the sequence of events at LAFB in late Oct 75 as related by Col Chapman to be essentially correct. Our information is summarized as follows:

a. 27 Oct 75 - An unidentified helicopter penetrated the base perimeter and on one occasion came within approximately 300 yards of the weapons storage area (WSA). The helicopter circled for about 13 minutes east-northeast of LAFB and disappeared. Sightings occurred between 1945 and 2000.

b. 29 Oct 75 - An unidentified aircraft approached the entry control point of the WSA at an altitude of about 100 feet. The aircraft came within 100 feet of the WSA on two occasions. Sightings occurred sporadically between 0050 and 0302.

c. 31 Oct-1 Nov 75 - An unidentified helicopter was observed hovering for about 15 minutes near the northwest perimeter of LAFB. It was later observed traveling approximately 200-275 feet above the ground and passed the west gate of the base. Sightings occurred between 2314 and 0140.

2. AFOSI technical support was initiated on 29 Oct 75 in response to base requests. This support consisted of

continued until 3 Nov 75. As an added note to Col Chapman's letter, AFOSI agents also were aboard the alert helicopter when it was scrambled on the evening of 31 Oct 75. Unfortunately, we were unable to identify the unknown helicopter during its one appearance subsequent to the initiation of this support.
