3. The alleged improper action by the undersigned agent in turning the above stated information over to another agency, was based on the belief that the information was of no further intelligence interest. Attention is invited to Memorandum HW 570th CIG dated 12 March 1945, File No. D-195239, Subject: HORTON Bros., in which it is stated that the HORTON Brothers had been located and interrogated by agents of another intelligence agency, and that no further information concerning them was desired. Instead of destroying the above documents the undersigned agent turned them to the 8-2 Augsburg Military Post. The undersigned agent stated to the 8-2 at the time of turnover that the information was no longer desired by our organization but that Air Intelligence might have use for them. It is apparent that the undersigned agent misinterpreted the memorandum dated 12 March 1945 as mention above.
