

Subj: Re: MacDill AFB aerial photos (XXXX)
Date: 3/1/2005 10:27:30 AM Eastern Standard Time

XXXX thanks for your 4:00pm- email. I think they may be marks from disc aircraft parked for a lengthy time due to grass, dirt etc. changing appearance as a result, especially those which may be imprints of landing gear. I think you should consider having that radio talk show host have you speak briefly on his broadcast, and again give you credit for another internet address as he did before. I think you should enter internet copy of the overflight photos, (even if no better than you presently have.) Doing so may help blow the secrecy and erroneous conclusions voiced by so many supposedly expert opinions who contacted you in even insulting manner on this subject. I also think you should send copy to each one of them. I think it's certain that putting those copies on the internet will help achieve exceedingly quick attention throughout the entire UFO research community and even result in your obtaining information never before provided you.

Best Regards, J. XXXX t-Publisher, Retired
