

12 NOV 03

~~_____~~ I HAVE NO WAY OF KNOWING
FOR CERTAIN ABOUT THE FOLLOWING :
BECAUSE I WAS NEVER BRIEFED ABOUT
THEIR USE — BUT, WHILE RE-READING
WHAT ONE OF YOUR "DOUBTERS" WROTE YOU
ABOUT THOSE; WHAT I THOUGHT WERE
SOME KIND OF CONTROL FLAPS ON THE
LEADING EDGE OF THAT BIG DISC, THE
THOUGHT STRUCK ME THAT THEY COULD
HAVE BEEN SOME KIND OF TECHNOLOGY
USED ONLY WHEN TAKING OFF AND LANDING
TO ALLOW THE FLIGHT CREW/PILOT TO
SEE THE GROUND AND RUNWAY — OR WHATEVER
ELSE IN FRONT. THEY COULD VERY WELL
HAVE RETRACTED BACK INTO THE LEADING EDGE
OF THE DISC RATHER THAN BEING FLAPS;
PARTICULARLY WHEN LANDING OR TAKING OFF AT
SLOWER SPEEDS, PERHAPS SOME EQUIPMENT
USED IN FULL FLIGHT ALSO? WHO KNOWS, BUT
IT SEEMS ENTIRELY POSSIBLE? JUST A THOUGHT,
1 ~~_____~~ (OVER)

P.S.

2

AGAIN, I THINK THAT DISC PHOTOGRAPHED
BEING TOWED BY THE JEEP WAS A
PRIVATELY BUILT TEST DISC THAT DIDN'T
HAVE BIG ENOUGH ENGINES TO BE SUCCESSFUL.

HOWEVER, PLEASE DO SEND ME AT
LEAST TWO MORE COPIES AND 2 MORE OF
THE ILLUSTRATION IN FLIGHT AND PARKED
IN FRONT OF THAT NASA BLDG.

AND - I THINK GEO. FILER HAS A VIDEO
OF SEVERAL OF THOSE PRIVATE ATTEMPTS TO
BUILD "FLYING SAUCERS". ONE OF WHICH IS
SHOWN IN TEST FLIGHT OR TAXIING.

THAT GUY WHO PHOTOGRAPHED SOME "SAUCERS"
PARKED BEHIND WHERE HE WAS HELPING
BUILD THOSE EARLY SATELLITE FACILITIES
SHOULD BE BACK AT HIS HOME. I TOLD
HIM I WOULD SEND HIM SOMETHING OF
INTEREST AND HE SAID HE WOULD SEND ME
SOME PHOTO COPIES HE HAD. OK, PLEASE
SEND ASAP. OK? THANKS.

HE STARTED
IN 1949, AS AN
ENGINEER BUILDING THOSE!
