

UFO landing reported in Weeley England

In May of 1978, [REDACTED] of Weeley England had an interesting nighttime encounter with a UFO. He described seeing a brilliant flash of light out on his farm, which he originally thought was a helicopter. Upon further inspection, he quickly determined that his initial assessment was incorrect. [REDACTED] claims that he was no more than twenty yards from a strange looking craft that had landed on his property. The UFO was described as having a mushroom shaped dome on top, with a middle section that appeared to have a series of slit-shaped port holes. He also reported seeing a ramp coming out of the side of the craft. The bottom measured approximately ninety feet across, and it was making a constant buzzing noise. Mr. [REDACTED] stated that he was originally terrified, but slowly moved closer to the craft to get a better look. Then, the craft lifted up, and sped out of sight. Out of fear of ridicule, he reported his sighting eight months after the event took place. Source: East Essex Gazette Jan 12, 1979
