Gentlemen:

I have enclosed the UFO report made by Miss [redacted] I drew the sketch according to her description. The map shows as closely as possible the positions of car, UFO, and airport.

[redacted] works as a research assistant in the psychology department at McGill University. She has done some work under my supervision. I have favorably recommended her for graduate work in psychology, and she will be enrolled for a M.Sc. in Educational Psychology at Harvard in September. I will certainly attest to her reliability, intelligence and caution as an observer: she is an excellent experimentalist.

Additional information, not included on the form, is that the object at its nearest approach was seen about one hundred and fifty feet ahead of the car occupied by [redacted] and her companion; she estimates its diameter as ten feet and its height as six feet; and that the object came towards them from across the water, at just above eye level, rose as it crossed the road, then maneuvered as described behind the trees.

I am an assistant professor of psychology at McGill. My specialty is visual perception. I know of no reason to suggest that [redacted] and her companion did not really see an object such as the one she described.

Yours truly,
[redacted]
