Re: Destron Fearing, Inc.

Steven:

That info about Destron Fearing was research done by [REDACTED]
[REDACTED] who's written so much about underground bases and tunneling.
It's actually in the
latest UFO Magazine (yeah, I know you're not crazy about the Eckers).
Once
in a while though they come up with a dynamite article like that one.
I still
subscribe and Joe does too; was over at Joe's house a few days ago
and saw some absolutely startling video footage he'd received O-:)=

>>Want to spear-head it?<<

I think we're treading on VERY dangerous ground here and should be
extremely cautious. One of the best people to contact in this arena
is Martin
Cannon at his [REDACTED]

[REDACTED] He wrote "The Controllers" and believes black ops are
responsible for most abductions. That's a REAL scary thought, but in
light of
DoE's revelations about gruesome nuclear experiments on unsuspecting
folks in the 50's, maybe we shouldn't be too surprised.

Actually, I'd prefer to believe abductions are being carried out
by ET's with
at least neutral motives than believe humans are doing some of the
worst of it
to their own kind. That's practically too horrible to comprehend.

Sigh, MM

*File
Abductions*
