

The Honorable Donald J Trump
GOP Presidential Nominee 2016

July 17th-21st, 2016
Cleveland Convention

Dear Mr. Trump:
Congratulations!

Undoubtedly, you are aware certain information has been withheld from past Presidents. Unacknowledged Special Access Projects [USAPs] exist within our government. USAPs often operate without Presidential knowledge or Congressional oversight. USAPs have been a sinkhole for trillions of taxpayer dollars since the 1950s.

Among USAP technologies being withheld are devices that create unmetered electricity sufficient to run our buildings and vehicles with zero residual emissions. These electric generation devices have been black-shelved, yet they could be inexpensively manufactured to provide unlimited wattage from an inexhaustible resource.

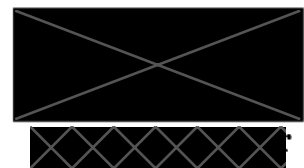

Our goal is to empower you to declare that USAPs are illegal and to take action to eliminate them, recover the funds and release zero-point energy technologies to all.

Dr. Steven M. Greer has championed this and other more lofty initiatives, detailed in the enclosed report he prepared for you. Upon request, Dr Greer briefed Clinton's cabinet in 2001. He also briefed President Obama in 2009. An excerpt of that briefing is provided here. The full 500-page report is on the accompanying DVDs. As the world's top subject matter expert, Dr Greer has been called upon by innumerable high officials in government and military intelligence in the USA and throughout the world.

Over the past quarter-century, Steven Greer has worked selflessly, at great sacrifice to bring this knowledge to light. A renaissance of awareness is accelerating across our globe. Change is imminent. We hope you will choose to play a meaningful role in it.

Dr. Greer is available to discuss these matters with you at anytime. He would also meet with you for at least one hour, when the time is right.

Sincerely,

Trump GOP Delegate - Maryland, District-2
