

MEMO
8 May 1995

TO: President Bill Clinton

FROM: CSETI Project Starlight, Steven M. Greer M.D.

RE: Meeting and Executive Order

Please find enclosed several documents previously conveyed to the Administration via the Director of Central Intelligence (James Woolsey), the President's Science Advisor and Mr. Bruce Lindsey regarding the UFO/ETI subject.

As mentioned previously, we feel that a strategy leading to disclosure on this subject should be urgently pursued, and we are requesting a meeting with relevant Administration officials as soon as possible. Astronaut Gordon Cooper, Apollo Astronaut Dr. Brian O'leary, John F. Kennedy Chief Steward for Air Force One, Bill Holden, a prominent NASA scientist, and others could attend such a meeting.

Our team has had recent conversations with former Air Force Office of Special Investigations and Naval Intelligence officers and other senior military personnel which indicate that current handling of this subject constitutes a threat to the national security, to the basic structures of constitutional democracy, and specifically to the integrity of the United States Constitution.

Long term trends towards increasingly covert, quasi-privatized, 'black-budget' management of this subject, combined with a concomitant increase in disinformation and public deception, must be arrested and reversed. Neither the Congress nor relevant and responsible military, intelligence and Administration officials are receiving honest and reliable information and assessments of this situation. Legal and constitutionally sanctioned control over this subject appears to have been diminished, if not completely lost, and this has created a dynamic of covert activities and programs which threaten the national security.

Multiple military intelligence sources have independently confirmed to us the use of experimental, SDI related weapons against extraterrestrial spacecraft, with at least two successful hits. If this has even a remote chance of being true, it would indicate the dire need for a reversal of the covert management of this subject, and the need for the public and the international community to dialogue on this subject in a sane and rational manner. Very senior members of the U.N. community with whom we have met concur with this assessment.

Who speaks for planet earth? We feel that the people of earth should, not a small covert

operation which, without consultation, controls a subject which affects the entire planet in vast and profound ways.

We feel that the Administration should take decisive steps to regain constitutional and accountable control over this matter, and that a strategy should be developed to effect a well-thought out disclosure.

We have located a number of military and intelligence witnesses to this subject who require a Presidential Executive Order releasing them from their national security oaths and obligations on this subject (see enclosed memo of 10 February 1995). We are urgently requesting that this be done as soon as possible. If there are no substantial disclosures resulting from these witnesses, then the subject may be put to rest. However, if what we have learned in confidence is true, then these witnesses can confirm the existence of extraterrestrial life forms visiting this planet, and help to move this matter into the public domain for dialogue and international consultation, thus effectively ending the exclusive covert control.

A subject this profound in its implications for life on earth must not be allowed to be the exclusive domain of a covert group which is accountable to neither the public nor recognized governmental authorities. For secret and covert processes are at great risk for taking on a life of their own, and in doing so threaten the security of our nation and of the world. We appeal to the President, the National Security Advisor and others in the Administration to take decisive steps to effect disclosure on this subject prior to the 1996 election year. In doing so, a great service will be rendered to the world and its peoples, and this important matter will rightly become the focus of the world community. We are acutely aware of the courage needed to face this challenge, but we are equally aware of the risks to world peace and democracy of doing nothing.

Please be assured that our hopes and our prayers are with you.

Sincerely,

Steven M. Greer M.D.
Director of CSETI
