Subject: Tesla motors

Dear Dr. Greer and associates,

I have a copy of your video and speech, which I received from a friend in my (extremely) small town yesterday. Your message has reached the hinterlands!

I wondered if you were aware of the free Tesla motors being offered at www.free-electric.com. I have a copy of their video and offer, which I obtained from their web site for \$30. I tried also to email them about you, but they don't have an address to which to send email to them on their site.

Have you read environmentalist [REDACTED] statement (which agrees with yours, but doesn't know yet about the Tesla technology)?

Best wishes with your important work.
