

The Covert Organization Responsible for the UFO/ET Issue: PI-40

Last code name related to me by reliable sources: PI-40

Meaning of code name: Unknown

Description: PI-40 is a quasi-governmental, USAPS related, quasi-private entity operating internationally/transnationally. The majority of operations are centered in private industrial 'work for others' contract projects related to the understanding and application of advanced extraterrestrial technologies. Related compartmentalized units, which are also USAPS, are involved in disinformation, public deception, active disinformation, so-called abductions and mutilations, reconnaissance and UFO tracking, space-based weapons systems, and specialized liaison groups (for example to media, political leaders, the scientific community, the corporate world etc). Think of this entity as a hybrid between government USAPS and private industry.

PI-40 consists primarily of mid-level USAPS-related military and intelligence operatives, USAPS or black units within certain high-tech corporate entities, and select liaisons within the international policy analysis community, certain religious groups, the scientific community and the media, among others. The identities of some of these entities and individuals are known to us, though most remain unidentified.

Approximately 1/3 to 1/2 or those comprising the decision-making body of PI-40 are now in favor of a public disclosure of some type on this matter; these are, in general, the younger members who have less complicity in past excesses. The remaining members are opposed or ambivalent regarding a near-term disclosure.

Actual policy and decision-making seems to rest predominantly at this time in the private, civilian sector, as opposed to USAP-related military and intelligence officials, though some information indicates that there is significant relative autonomy in certain areas of operations. It is our current assessment that a rising degree of debate exists within PI-40 regarding certain covert operations and the advisability of a disclosure.

Many compartmentalized operations within 'black' or USAPS projects are structured so that those working on the task may be unaware that it is UFO/ET related. For example, some aspects of the so-called 'Star Wars' effort, or SDI, are intended to target extraterrestrial spacecraft which come into close proximity to earth, but the vast majority of scientists and workers in the SDI program are unaware of this.

We have learned from three separate, corroborating sources that since the early 1990s, at least 2 extraterrestrial spacecraft have been targeted and destroyed by experimental space-based weapons systems.

The vast majority of political leaders, including White House officials, military leaders, congressional leaders, UN leaders and other world leaders are not routinely briefed on this matter.

When and if inquiries are made, they are told nothing about the operations, nor is the existence of any operation confirmed to them. In general the nature of this covert entity ensures that such leaders do not even know to whom such inquiries should be addressed.

International cooperation exists to a wide extent, though some witnesses state that certain countries, particularly China, have aggressively pursued somewhat independent agendas.

Major bases of operations, apart from widely diversified private sites, include Edwards Air Force Base in California, Nellis Air Force Base in Nevada, particularly S4 and adjacent facilities, Los Alamos New Mexico, Fort Huachuca Arizona (Army Intelligence Headquarters), the Redstone Arsenal in Alabama, and a relatively new, expanding underground facility accessible only by air in a remote area of Utah, among others. Additional facilities and operations centers exist in a number of other countries, including the United Kingdom, Australia, and Russia. Numerous agencies have deep cover, black, USAPS related units involved with these operations, including the National Reconnaissance Office (NRO), the National Security Agency (NSA), the CIA, the Defense Intelligence Agency (DIA), the Air Force Office of Special Investigations (AFOSI), Naval Intelligence, Army Intelligence, Air Force Intelligence, the FBI, and others. An even more extensive list of private, civilian and corporate entities have significant involvement. The majority of scientific, technical and advanced technology operations are centered in the civilian industrial and research firms. Significant - and lethal - security is provided by private contractors.

The majority of personnel as well as the leadership of most if not all of these agencies and private groups are uninvolved and unaware of these compartmentalized, unacknowledged operations. For this reason, sweeping accusations related to any particular agency or corporate entity are wholly unwarranted. 'Plausible deniability' exists at many levels. Moreover, specialization and compartmentalization allows a number of operations to exist without those involved knowing that their task is related to the UFO/ET subject.

Both positive inducements to cooperate and penalties for violating secrecy are extraordinary. A senior military source has related to us that at least 10,000 people have received \$1 million or more each to ensure their cooperation, over the past few decades. Regarding penalties, we know of more than one credible case where individuals have had their families threatened should they break the code of silence, and we have learned of two recent alleged 'suicides' at a private contract industrial firm which occurred after the victims began to violate secrecy on a reverse-engineering project related to ET technology.

Funding: A senior congressional investigator has privately related to us that 'black budget' funds apparently are used for this and similar operations, which are USAPS. This 'black budget

involves conservatively \$10 billion, and may exceed \$80 billion per year. The amount dedicated to the UFO/ET operation specifically is unknown at this time. Additionally, significant funds are derived from overseas sources and private and institutional sources. Amounts deriving from these activities are also unknown by us.

This is part of what we know at this time. Obviously, there are more questions than answers here, and what is unknown exceeds what is known. Nevertheless, we have, I believe, made

significant and historic advances in understanding how this entity operates. I have presented this general assessment to a number of important military, political and policy institute figures, and was surprised that it was regarded as quite accurate and in agreement with independent assessments arrived at separately by them.

But the larger question is why? As in life in general, the whats, whos and hows are always easier than the whys. Why the continued secrecy and deception?

I am reluctant to go too much further out on this limb, because here we get into questions related to ultimate motive and purpose, which is always a rather squishy area, ill-defined in the best of cases. And this, I am afraid, is no ordinary matter, and the emotions, motives and purpose behind such extraordinary and high-stakes actions are likely complex and dissonant. Indeed, such motives are likely a very mixed bag, ranging from the initially noble and well-intentioned, to the depraved.

Sen. Barry Goldwater told me in 1994 that the secrecy surrounding the ET subject was "a damn mistake then and a damn mistake now...". I am inclined to agree with the senator here, but the drive for secrecy was not and is not altogether rooted in stupidity. Rather, I see it rooted in fear and a lack of trust.

While I generally dislike psycho-babble, I believe the psychology of all of this is important. It is my belief that secrecy, especially extreme secrecy of this degree, is always a symptom of illness. If you have secrets in your family, it is a sickness, born out of fear, insecurity and distrust. This, I feel, can be extended to communities, companies, and societies. Ultimately, the drive for secrecy is a symptom of a deeper malaise derived from a fundamental lack of trust, and an abundance of fear and insecurity.

In the case of UFOs/ET, the early days of the 1940s and 1950s were, I sense, a time of fear bordering on panic. We had just emerged from a devastating world war, and unleashed the horror of nuclear weapons. The USSR was expanding its empire, and arming itself to the teeth with bigger and deadlier nuclear weapons. And they were beating us in the race into space.

Now along comes extraterrestrial spacecraft, which are retrieved along with deceased (and one living) life form. Panic. Fear. Confusion. Countless unanswered questions arise, all tinged with fear.

Why are they here? How will the public react? How can we secure their technology - and keep it from our mortal enemies? How can we tell the people that the most powerful air force in the world cannot control its airspace? What will happen to religious belief? To the Economic order? To Political stability? To the keepers of current technology? To....

It is my opinion that the early days of secrecy were predictable, even understandable, and possibly even justifiable.

But as the decades rolled by, and especially with the end of the Cold War, fear alone does not fully explain the secrecy. After all, 1996 is not 1946 - we have been to space, landed on the

moon, detected planets around other star systems, found the building blocks of life in far-away space, and about 50% of the population believe the UFOs are real. And the soviet empire has collapsed.

I believe two other significant factors are at play now: Greed and control, and the inertia of decades of secrecy.

Greed and control are easily understood: Imagine being involved with a project unraveling and then applying advanced extraterrestrial technology. The power and economic impact - and thus value - of such technology exceeds the combined significance of the internal combustion engine, electricity, the computer chip and all forms of telecommunications. We are talking about the technology of the next millennium. You think the computer/information age revolution is big? Fasten your seat belts, because down the road - sooner or later - will be the non-linear, zero point technological revolutions based on advanced ET technologies.

No wonder the corporate, military-industrial complex interest and secrecy exceeds even that of the government related USAPS. The formula for Coca Cola has nothing on this.

The bureaucratic inertia of large secret operations is yet another matter. After decades of operations, and of lies, public deceptions and worse, how does such a group unravel all the webs it has weaved? There is a certain addictive allure to secret power for some types of people; they are charged by having and knowing secrets. And there is the specter of a sort of cosmic Watergate, with all manner of people calling for this head or that. It becomes easier to maintain the status quo, something all bureaucracies are adept at doing.

And even now there is fear. Not just fear of being exposed in the age of Watergate, this -gate and that-gate, but a rather xenophobic and primitive fear of the unknown. Who are these humanoids, why are they here; how dare they enter our airspace without our permission! Humanity has a long tradition of fearing - and hating - that which is different, unknown, from elsewhere. Witness the still-rampant racial, ethnic, religious, and nationalistic prejudice and hatred which ravage the world of humanity. There is an almost ingrained xenophobic response to the unknown and that which is different. And it is certain that the ETs are more different from us than, say, protestants are from catholics in Ireland.

I once asked a physicist involved with military and intelligence operations related to UFOs why we were attempting to destroy these spacecraft with advanced space-based weapons. He immediately became agitated and said, "Those cowboys running this thing are so arrogant, so out of control, that they view any entry by a UFO into our air space as an offense worthy of a hostile response. And they are going to get us into an inter-planetary conflict if we are not careful..."

And so it goes. Fear. Fear of the unknown. Greed and control. Institutional Inertia. These are a few of what I see as the current animating forces driving the continue secrecy of PI-40.

But where to from here? How to transform this situation from extreme secrecy to disclosure?

There is an old Chinese proverb which says, "Unless we change directions, we are likely to end up where we are going." How true. And where we are going in this area is immensely dangerous. Extreme secrecy, especially on something this far-reaching and important, undermines democracy, subverts the constitution, concentrates enormous technological power in the hands of the unelected few and puts the entire planet in harms way. This must end.

CSETI Project Starlight has been working for nearly 3 years to collect evidence, identify current and former government, military, intelligence and corporate witnesses, and brief various world leaders. Much has been accomplished, with no paid staff, no significant funding and the dedication and volunteer efforts of a persistent team. But much remains to be done. Here is a partial list:

In June of 1995, we convened a meeting of important military and government witnesses from the US and Russia, and we all signed a letter asking President Clinton to issue an executive order permitting such witnesses to speak without penalty or retribution. I suggest that the Administration, in cooperation with Congress, sponsor open hearings where these witnesses, who now number over 2 dozen, could openly testify to what they know about the UFO/ET matter. This would constitute a definitive disclosure, I assure you. In this regard, you can help in two ways : 1) Write the President and ask that he issue an executive order permitting these witnesses to safely come forward, and at the same time write your Senator and Congressman and request that they sponsor open hearings where these witnesses may speak. 2) Contact me immediately if you or someone you know may be a current or former government, military or corporate witness . We have protective measures in place, and the more witnesses we have, the stronger the case - and the greater the margin of safety for all concerned. Please help us if you can.

The international community and the United Nations should similarly hold open hearings on this matter. We have witnesses from all over the world, and ideally, an international disclosure and evidence gathering effort should begin immediately.

The world community should not sit by passively, thus abdicating responsibility to secret operations. CSETI has for 5 years been involved in a citizens diplomacy effort, and made significant breakthroughs in developing protocols to contact these extraterrestrial visitors. Rather than passively watching this as some distant 'phenomenon', we should attempt to establish communication with these life forms, and begin the early stages of an open inter-planetary relationship. If you are interested in learning more about how you can be involved in such a research and diplomacy effort, contact us.

Lastly, we must be prepared to forgive. There is nothing to be gained by calling for severe retribution for those involved with either current or past secrecy. Many may have felt they were doing the right thing at the time, and even currently. We do not need a cosmic Watergate, and we must collectively renounce it. We should be willing to look to the moment and to the future, and forgive the past. There is precedent for this: In the early days of the Clinton Administration, there were sweeping disclosures about past excesses and crazy experiments within the Department of Energy, and the former Atomic Energy Commission. We learned of plutonium being put on

the oatmeal of kids in orphanages, of deliberate radiation releases in populated areas to see 'what would happen', and so forth. This truth came out, and the world did not end. Nobody had to go to jail. The government did not collapse, and the sky did not fall. Let us move forward, with some real compassion and forgiveness, and begin the next century anew.

Ultimately, if the people will lead, the leaders will follow. Courage, vision and perseverance are needed to transform this situation, and create a time of openness, trust and to lay the foundation for both global and inter-planetary peace. If our leaders currently lack this courage and vision, then we must manifest it for them. The stakes are too high to look the other way while our future is stolen from us. The future of life on earth, and our place in the cosmos, are at risk. Together, let us work to secure it, for our children and our children's children.

Steven M. Greer M.D.
Director of CSETI
21 May 1996
