

Witness Archive Project

Information for Witnesses

Background:

Since 1993, Dr. Steven M. Greer and CSETI have been identifying government, military, intelligence and corporate witnesses to projects and events related to so-called UFOs and Extraterrestrial intelligence and associated technologies.

These witnesses are from numerous countries around the world. From 1993-2000, we have systematically presented briefings and substantive evidence to leadership in the United States and other countries, including the US President, CIA Director, Joint Staff, Defense Intelligence Agency, numerous members of Congress, senior UN officials, and others. During these briefings, top secret witness testimony, government documents and other evidence has been presented. Beginning in the fall of 1993, at a meeting at Wright Patterson Air Force Base and later with CIA Director James Woolsey, we requested a near-term disclosure on the subject.

In 1998, after exhaustive attempts to obtain government support for such a disclosure and in the light of government non-responsiveness, it was decided that a civilian-led disclosure was necessary. Indeed, members of Congress, senior military officers and other government leaders specifically recommended that we pursue this outside of government channels and that a civilian-led public interest disclosure would be the only way to secure official hearings and other actions from the government. Therefore, since 1998, we have been organizing such a disclosure and can now announce that the support, evidence and funding are in place to actualize such a project.

Role of Witnesses:

It has been determined that a credible disclosure must involve government, military, corporate, and intelligence witnesses who are:

- credible
- have 1st hand knowledge of events, projects and evidence
- are organized into a coalition or group to come forward en masse in a carefully planned disclosure strategy.

While supporting evidence such as photos, government documents, physical evidence and the like are important, it is the testimony of dozens of credible 1st-hand witnesses which will most effectively succeed at disclosing the subject. The other evidence combined with this witness testimony will make an undeniable case to mainstream scientists, political leaders and the public. It is noted that past disclosures by isolated witnesses (e.g. Col. Corso and others) have not been effective because it was not coordinated by a strategic plan or supported by other corroborating witnesses. Here the saying, "The whole is greater than the sum of the parts", applies. Multiple, coordinated witnesses coming forward together creates a dynamic which far exceeds what can be accomplished by a person coming forward alone. There is security, strength and enhanced credibility by numerous witnesses coming forward together.

The Witness Archive Project is designed to identify, verify and document the testimony of dozens of top secret witnesses. This archive will be used to:

- preserve for posterity such testimony
- create executive briefing materials for leaders in society and the public,
- create a multi-media, international disclosure news project to inform the public world-wide of the reality of the subject.

Goals of Disclosure:

- To effect a credible, international disclosure of the facts so that the subject is established as real, legitimate and relevant.
- By doing so, to return control and management of this and related issues to democratic, legal and constitutional control.
- To restore oversight of rogue, unacknowledged ("black") projects which are clearly out of control.
- To prevent the unnecessary weaponization of space and its attendant world security risks.
- To release technologies related to energy and propulsion systems which could replace environmentally damaging fossil and nuclear sources of energy.

Witness Archive Project Procedures:

Once a prospective witness is identified he or she will be contacted by Dr. Greer or a senior researcher approved by the project. An initial history and data base will be created from initial interviews. The witness will then be scheduled for a formal interview using state-of-the-art video and audio recording equipment. Once all witnesses are interviewed the archive will be reviewed and selections made for the Executive Briefing Summary and other uses described above. Witnesses are asked to avoid media or public exposure until appropriate, coordinated strategies, news conferences and media arrangements are finalized. This will ensure an effective and powerful disclosure.

Security. It should be noted that the project has substantial support within various social, political, military and intelligence circles. By identifying with the project and joining with others in a unified effort, an umbrella of protection is extended to such witnesses. Dr. Greer should be notified immediately upon any warnings or threats to a prospective witness and appropriate actions will be taken. All materials related to interviews are multiply duplicated and placed in secure storage and also in the hands of influential individuals thus negating any attempt to muzzle the project.

UNOD (Unless Otherwise Directed). Note: In November 1996, we sent a letter to all key political, national security, military and intelligence officials regarding the invalidity of any national security oaths related to the subject (see attached). This UNOD letter states that, since projects related to the subject are unacknowledged, "black", unlawful and unconstitutional, all legal agreements arising therefrom are, a priori, null and void. No corrective action or directive was ever issued to counter this assertion by us. Therefore, we regard such oaths as null and void,

without legal merit and witnesses should act accordingly. Indeed, senior Pentagon officials have stated that , if at all possible, we should publicly effect such a disclosure. This was communicated to us in the spring of 1997.

Beyond this, we consider it one's patriotic duty to uphold and protect the constitution by coming forward. In light of the rogue, unlawful, unconstitutional and dangerous nature of such unacknowledged projects, disclosing information related to such projects is morally justified. Given the threats to democracy posed by such projects and the clear and imminent dangers to world security and the environment created by these USAPs, the conscience of each witness should be clear that he is doing the right and just thing by coming forward.

Our way of life, Democracy, the rule of law, national and world security and the future of the human race and the earth's environment all , in part, depend on the success of this effort. You, as a witness to events or projects related to UFOs/ ETI, will have a tremendous contribution to make to our collective future. No witness is insignificant since the big picture is created only by careful assembly of each piece of the mosaic. The time has come to join together and to tell the truth about this critically important subject. If not now, when? And if not us, who?
