

Excerpts from "MILABS – Military Mind Control and Alien Abductions"

Helmut Lammer – 1999 – a scientist with the Austrian Space Research Institute at the time the book was written.

(MILABS – stands for Military Abductions)

"Alien Abductions are a very strange and complex phenomenon. For skeptics, most journalists, and the public it is hard to believe that abductions by non-human beings have their basis in physical reality. Reports of alien beings entering bedrooms through walls and levitating abductees through closed windows into a waiting UFO are hard for the open-minded researcher to believe, too.

However, well respected researchers have shown that the "core" of the alien abductions phenomena cannot be explained as a "known" psychological phenomenon, hallucinations or mass delusions.

Recently some alien abductees have said that they have been kidnapped by military/intelligence personnel and taken to hospitals and /or military ground/underground research facilities. Not many of the popular books on the subject of alien abductions mention these experiences. Especially disconcerting are the facts that abductees recalled seeing military intelligence personnel together with alien beings working side by side in these secret research facilities. The presence of human military and/or civilian personnel inhabiting the same physical reality as the alien beings exceeds the mindsets of the skeptics and the open-minded researchers by several orders of magnitude.

.....

If one reviews hypnosis transcripts of MILAB abductees and compares their recovered memories with the experiences of survivors of now known declassified government sponsored mind or behavior control experiments, one will find a strong indication that covert "human" military personnel are involved in the alien abduction phenomenon. Many researchers ignore or don't understand MILAB experiences because they are not familiar with competently investigated MILAB cases.

We believe that alien abduction cases where the abductee reports that he or she was abducted by the military (or humans) are very important for two reasons:

1. If the UFO community has evidence that a covert military intelligence task force is involved in the alien abduction phenomenon, the public would then know that alien abduction experiences represent a matter of national security.
2. The alleged military involvement in the abduction phenomenon could be evidence that black-ops units use abductees for mind-control and behavior-control experiments, as test-targets for microwave or mind-altering weapons, or that they monitor and kidnap abductees for information gathering purposes during an alleged alien abduction experience.

.....

Recently, the White House released some letters and documents concerning the "Rockefeller UFO Initiative" to researcher Rick Coimbra via the Freedom of Information Act (FOIA). In one letter Dr. C.B. Scott Jones mentioned that there are reasons to believe that some government group has interwoven research about mind-control technology with alleged UFO phenomena.....

.....

We believe that Dr. Scott Jones note and the evidence which comes from alien abductees who claim that they were also being kidnapped by military intelligence personnel will lead the open-minded researcher to three important questions.

- 1) Is it possible that secret human experiments or covert operations are occurring in Western democracies?
- 2) What is the human agenda which seems to be involved in the alien abduction phenomenon, and what is the purpose of MILABs: military abductions of alleged alien abductees?
- 3) Is there a military interest in developing brain-implants, virtual-reality implants, holographic image projection, cloaking devices, mind-altering weapons and genetic research?

An interest in these technologies would support the hypothesis that such secret experiments could occur on humans and that these experiments are being hidden from the U.S. Congress and the public by placing the funding inside secret or "black projects".....

We believe that MILAB abductions may be the indication that a covert military intelligence task force operates at least in the U.S. and Canada and is involved in monitoring and kidnapping of alleged alien abductees. In the early 1980s, a lot of money, both legal and black budget, became available for top secret military projects like the Strategic Defense Initiative (SDI). This task force and related projects may be financed by a portion of this money. It seems to us that they are interested in well investigated alien abductions cases.

.....

Another reason for military interest in abductees could be the so-called PSI-factor. Most alien abductees claim that they communicated via telepathy and that they have enhanced PSI capabilities after their encounters with alleged aliens.....

Other paranormal phenomena like psychokinesis, precognition, controlled out of body, remote viewing and the study of ELF waves for large scale behavior modification on humans were also mentioned. In November 1996, the CIA and DIA made public their 24 years of covert support for PSI programs on "remote-viewing". Since those projects were funded with about twenty million dollars, there is reason to believe that there were other

programs concerned with parapsychology not yet disclosed. Some believe that work in these areas continues despite the Government agencies' public denial.

If a branch of the U.S. military shows an interest in the development of PSI related weapons, one can speculate that they may have an interest in alleged alien abductees too.
