20 December 1997

Dear Senator/Congressman,

The Center for the Study of Extraterrestrial Intelligence (CSETI) has collected a significant amount of scientific data regarding the existence of extraterrestrial intelligence and UFOs through its Project Starlight initiative.

Additionally, we have identified several dozen first hand government, military and intelligence witnesses to UFO/ETI events who wish to come before Congress and provide testimony on this important matter. These are heroes of our country who are bona fide witnesses to extraordinary events, about which both the American public , and the world, deserve - and need- to know .

CSETI will be hosting a closed, confidential briefing on this matter, which is of critical national security importance, on _____, at _____. At this briefing , we will provide you and your staff with extensive scientific and evidentiary briefing packets, and you will have an opportunity to meet some of these government witnesses who wish to testify. In attendance will be military, intelligence and astronautic figures of significant stature who will verify the reality and national security importance of this subject.

This briefing will be closed to the media and public, and will only be open to bona fide government and military leaders.

We hope that you and members of your staff will be able to attend this briefing. CSETI is in the late stages of planning a world wide disclosure on this subject, which will include the testimony of these important government and military witnesses. We feel that it is imperative that members of Congress and other leaders in our government have an opportunity to learn about this matter and that our democratic institutions be included in the disclosure process. It is our intent to see that this disclosure is scientific, hopeful and conducted in such a way that neither our government nor our society are harmed. We need your involvement to see that this occurs in the best way possible.

Please let us know if you and/or members of your staff will be able to attend this historic meeting.

Sincerely,

Steven M. Greer M.D.

Director of CSETI
